

## Zero-Emission Vehicle Infrastructure Partnership (ZEVIP)

### Notice of Proposed Awards

Revised – October 4, 2023

The Washington State Department of Transportation’s Office of Innovative Partnerships released a notice of funding opportunity and grant application guide on March 1, 2023. This open and competitive solicitation initially announced the availability of \$3 million in grant funds for projects that install direct current fast charging stations or hydrogen fueling stations along priority corridors in Washington; the funding level was later amended to approximately \$30 million dollars after the State’s 2023-2025 Transportation Budget was finalized in June 2023. Eligible applicants included non-profit organizations, Tribes, and other governmental organizations, in cooperation with a private sector partner.

WSDOT conducted a webinar and formal question and answer period specific to this solicitation. WSDOT received 27 applications totaling \$49,107,827 in grant requests. These applications were reviewed and scored by a panel of experts from WSDOT, the Department of Commerce, the Department of Enterprise Services, the Department of Ecology, and Washington State University. The evaluation criteria included Location (20 points), Implementation, Operations, and Maintenance Plans (20 points), Budget / Match (15 points), Benefits (15 points), Readiness and Schedule (10 points), Team Qualifications (10 points), Innovation and Sustainability (5 points) and Equipment (5 points). All reviewed projects met the minimum scoring threshold. No hydrogen applications were received this solicitation.

Table 1, Notice of Proposed Awards (NOPA), identifies the apparently successful applicants and the recommended funding level of awardees. WSDOT will email this NOPA to all parties that submitted an application through the solicitation and post the table on the ZEVIP website. Figure 1 displays the applicant site locations throughout Washington.

Funding of proposed projects resulting from this solicitation is contingent upon successful negotiation with applicants to finalize the project scope and grant agreement. No agreement between WSDOT and the apparently successful awardee is in effect until the agreement is signed by both the grant recipient and WSDOT’s representative. Apparently successful awardees may not release informational pamphlets, press releases, and/or similar public notices concerning this project without obtaining prior written approval from WSDOT.

Questions should be directed to: Kara Symonds, ZEVIP Grant Manager
