1-02.6.OPT5.NEW.FR1 (Alternative Bids)

1		(September 7, 2021)
2		Use in projects when the proposal is to contain alternate
3		items for bidding. Fill-ins consist of a brief description of the
4		portion of the project or of the work that would be subject to
5		alternative bidding. Repeat the "Alternative" paragraphs if
6		the project consists of more than two alternatives.
7		(4 or more fill-ins)
8		
9	1-02.6.OPT6.FR1	(Cumulative Alternate Bidding)
10		(August 3, 2015)
11		Use in contracts when the award process is modified to
12		include cumulative Alternates. The region shall determine
13		and notify the Ad and Award office of the Funds Available.
14		The bid items shall be segregated into a Base Bid and
15		Alternates as appropriate. Fill-ins consist of a brief
16		description of the portion of the project or of the work that is
17		included in the noted Alternates. The specification
18		language may be adjusted to suit the number of Alternates.
19		
20		Use of this GSP requires the approval of the HQ Ad and
21		Award Manager and HQ Assistant State Design Engineer.
22		When requesting approval, provide documentation of funds
23		available, and that Approvals consistent with Design
24		Manual Chapter 300 exist for the Base project and each
25		potential combination of Base plus Alternates.

(October 3, 2022)
Use in all WSF projects.

[1-05.3.OPT3.GR1](#) (Work Plan)
(October 3, 2022)
Use in all WSF projects.

[1-05.4.GR1](#) Conformity With and Deviations from Plans and Stakes

[1-05.4.INST1.GR1](#) (Section 1-05.4 is supplemented with the following)
Must use once preceding any of the following:

[1-05.4.OPT1.GR1](#) (Contractor Surveying - Structure)
(February 6, 2023)
Use in projects requiring the Contractor to do all surveying needed for bridges, buried structures, walls, or marine structures. May be edited to retain portions of surveying for WSDOT crews but editing to assign additional work to the Contractor requires HQ Construction Office approval. Do not use for bridge deck paving existing surfacing profile work (already covered by Section 6-08.3(2)). Do not use for concrete overlay existing surfacing profile work (already covered by Section 6-21.3(4) or 6-22.3(4) depending on the type of overlay).

[1-05.4.OPT2.GR1](#) (Contractor Surveying - Roadway)
(January 13, 2021)
Use in projects requiring the Contractor to do all surveying needed for roadway items. May be edited to retain portions of surveying for WSDOT crews but editing to assign additional work to the Contractor requires HQ Construction Office approval. Must also use **2-03.4.OPT2.GR2** if roadway excavation or embankment is included in the project.

[1-05.4.OPT3.GR1](#) (Licensed Surveyors)
(April 4, 2011)
Include in projects requiring the Contractor to supply professional land surveyors to establish right-of-way lines and other monuments. Use of this GSP for Local Agency projects requires the approval of the HQ Local Programs Office.

[1-05.4.OPT4.GR1](#) (Contractor Surveying – ADA Features)
(March 9, 2023)
Use in all projects that require any ADA work.
Must use with **8-14.3.OPT2.GR8** and **8-14.3.OPT3.GR8**.

3		
4	<u>1-05.9.OPT1.FR1</u>	(Machine control grading)
5		(April 7, 2008)
6		Use in eligible projects that require extensive grading if
7		adequate design files have already been created during the
8		design process. Eligible projects are those that require
9		large areas of linear grading or mass quantities of roadway
10		excavation, and are in locations where satellite signals are
11		not obstructed by natural or manmade feature (such as
12		highly mountainous areas or urban canyons). Requires
13		approval of Region Construction Manager.
14		
15		Must also use 1-05.4.OPT2.GR1 (Contractor Surveying –
16		Roadway).
17		(2 fill-ins) The first fill-in describes the type of data to be

Confined Space
(April 3, 2006)

Must use when Contractor workers are required to enter a confined space and all other projects where confined spaces are known to exist. Use requires approval of the Region Safety Manager.

A confined space is a space that is ALL of the following:

- Large enough and arranged so an employee could fully enter the space and work.
- Has limited or restricted entry or exit. Examples of spaces with limited or restricted entry are tanks, vessels, silos, storage bins, hoppers, vaults, excavations, and pits.
- Not primarily designed for human occupancy.

Examples of confined spaces include but are not limited to concrete or steel box girder structures, pontoons on floating bridges, existing

Must use once preceding any of the following:

1-07.6.OPT1.FR1 Permits and Licenses
(January 2, 2018)
An Environmental Commitment Meeting is expected as outlined in Division 4 of the Plans Preparation Manual.

*This GSP requires editing the data located in the permit table located at:
http://www.wsdot.wa.gov/publications/fulltext/projectdev/EnvironmentalDocumentation/1-07.6.OPT2.FR1_Table.docx, copying and pasting the revised table inside this fill-in area. This needs to be edited prior to insertion and final printing to delete all permits that are not required for the project and insert additional permits not part of the original table. All permits will be attached as an Appendix. Include the Department of Ecology permit coverage letter with the CSWGP. If using a Nationwide Permit, attach the most recent U.S. Army Corps of Engineers Nationwide Permit Verification Letter, conditions, and permit drawings.

(Accommodating Oversized Loads through the Work Zone)

(April 14, 2014)

Use in projects on the following routes:

I-5, I-405, I-90, I-82, I-182, SR 18, SR 167 and US 395 (Tri-Cities to Spokane)

If there is the potential for the travelled way to be reduced to less than 16 feet

The designer is authorized to modify this specification as necessary to coordinate with the rest of the contract provisions that may contradict, provided the intent of the GSP is maintained. The intent being; provide a clear width of at least 16 feet to accommodate a wide load, provide windows of time to accommodate a wide load (if possible) and/or provide notice as described. Changes in this specification should be coordinated with Commercial Vehicle Services.

This specification requires that the Engineer must approve any proposed reduction of the travelled way to a single lane with a clear width of less than 16 feet for duration of 4 calendar days or more.

[1-08.6.OPT1.FR1](#)

(Procurement Suspension)
(January 3, 2017)
Requires approval of HQ Construction. Use in projects requiring materials that have long lead times for procurement or fabrication, or proprietary/specialized materials, HMA Mix Design evaluation, and procurement of the materials or HMA Design evaluation is a controlling factor in the time for completion. Not recommended if material procurement or mix design approval are not critical path items. Use 1-08.6.OPT2.FR1 instead, if project does not include HMA paving.

Fill-in #1 identifies materials that are critical for timely completion and require fabrication or long lead times for procurement. Examples of critical materials may include Hot Mix Asphalt, landscaping (cultivated) items, permanent signing, steel guardrail posts, ITS equipment, modular expansion joints, bridge railing, hydraulic/electrical rehabilitation components, bridge girders, buried structures, steel jackets for seismic retrofits, castings, single-source drain pipe, signal controllers, light standards, or signal standards.

Fill-in #2 limits the duration of the suspension for acquisition of critical materials. The duration of the suspension should be appropriate for the work being performed and will vary according to the type of materials required.

The use of a short duration may be impossible to achieve or may raise the cost of the project.

- On the web page, click on the **West Coast less California**, listed under the heading **U.S On-Highway Diesel Fuel Prices*(dollar per gallon)** at the lower end of the web page.
- In the pull down box labeled **Period** pull down **Monthly**
- Click on the fuel price history found under the column heading **View History** for the line **Diesel (On-Highway) – All Types**.

Multiply the Base Fuel Cost by the appropriate Contract Duration Factor (below) to determine the Estimated Monthly Fuel Cost.

Contract Duration	Contract Duration Factor
Up to 1 year	1.10
1 to 2 years	1.25
2 to 3 years	1.37
3 to 4 years	1.49
4 to 5 years	1.62

Estimate the amount of the Adjustment:
Use the formulas below.

$$\text{Adjustment} = (\text{Est. Monthly Fuel Cost} - (1.10 \times \text{Base Fuel Cost})) \times Q$$

Where Q = □ ((Fuel Usage Factor) x (Total Quantity of each Eligible Bid Item)) for all Eligible Bid Items.

Sample Calculation:
My project is 300 working days. It contains 10,000 tons of HMA Cl. 1/2" PG 70-22, and 500 tons of CSBC.

HMA Cl. 1/2" PG 70-22 is Eligible for Adjustment.
Crushed Surfacing Base Course is Eligible for Adjustment.

From U.S. Energy Information Administration website :
most recent Monthly Fuel Price = 3.06 dollars per gallon. This monthly price becomes the Base Fuel Cost.

Therefore:
Base Fuel Cost = 3.06 dollars/gal
Est. Monthly Fuel Cost = Base Fuel Cost x Contract Duration Factor
Est. Monthly Fuel Cost = 3.06 x 1.25 = 3.825 dollars/gal

$$Q = (0.70 \text{ gal/ton} \times 500 \text{ tons}) + (0.90 \text{ gal/ton} \times 10,000 \text{ tons})$$
$$Q = 9,350 \text{ gal}$$

$$\text{Adjustment} = (3.82 \text{ dollars/gal} - (1.10 \times 3.06 \text{ dollars/gal})) \times 9,350 \text{ gal}$$

Steel Cost Adjustments
(August 6, 2018)
Use in all projects that use quantities of steel in excess of 50,000 pounds, including non-proprietary walls, pedestrian bridges and vehicular bridges.

Fill-in #1 is the initial cost basis of steel and should use a value of \$0.40/lb. Any deviation from the default value of \$0.40/lb requires approval of the HQ Construction Office.

Fill-in #2 is a list of the bid items that are eligible for steel cost adjustment. This can include bid items that are entirely composed of steel (e.g., Steel Reinforcing Bar for Bridge) and can also include lump sum items that use significant quantities of steel (e.g., Superstructure, Lump Sum). Contact the HQ Strategic Analysis and Estimating Unit for assistance preparing the Engineer's Estimate for the bid item "Steel Cost Adjustment."

Fill-in #1 is a list of the specific duties the WSP personnel may perform during active work zones. Refer to the WSDOT Traffic Manual (M 51-02) Chapter 5-19.C for a list of specific recommended assignments. WSP should not be shown on the traffic control plans and the duties should be independent from the traffic control installation, operation and removal.

Fill-in #2 is the number of hours that the Contracting Agency will pay the full cost of these WSP duties. This number may be zero if allowing the contractor to request the WSP duties at a 50/50 cost-sharing option during the project is determined acceptable.

Consider use on freeway projects when traffic will be reduced to a single lane with temporary traffic control and workers will be present in close proximity behind channelization devices. Consider a regulatory speed limit reduction when the single lane of traffic will be shifted onto the shoulder away from the work area. The Region Traffic Engineer will need to approve the speed limit reduction.

(Smart Work Zone System)
(April 15, 2024)

Consider including a smart work zone system (SWZS) for projects where long-term (4 or more days) temporary traffic control restrictions will cause regular or ongoing traffic congestion and delays in approximately the same location. This system is intended for queues up to 9 miles. Typical traffic control plans are available for 6-mile and 9-mile systems. Queue detection warning, dynamic lane merge, and travel delay offer work zone queue mitigation. Consult your region traffic engineer for assistance.

Consider including a queue warning system (QWS) for projects where daily, nightly, weekend, or durations up to one week where temporary traffic control restrictions will cause intermittent traffic congestion and delays in different locations as closures move with work operations (such as pavers) but also in the same location. This system is intended for queues of up to 3 miles. Freeway Typical Traffic Control Plans will soon be updated to include the Queue Warning System option (Sheet 1A). Queue detection warning and dynamic lane merge offer work zone queue mitigation. Consult region traffic engineer for assistance.

If the queue warning system is included in the lump sum cost for “Project Temporary Traffic Control,” do not use with **1-10.4(2).OPT7.GR1** and **1-10.5(2).OPT4.GR1**.
