

Digital Imagery Request

The Transportation Data, GIS & Modeling Office is responsible for the archival, retrieval and distribution of current and historical digital videos and still imagery of the Washington State highway system and related roadside features, which are indexed by state route measure. Copies of the images and video are often requested by other state and local agencies, as well as by the public.

Note: Imagery available through this program does not include video footage from WSDOT's network of intersection and freeway incident management cameras. WSDOT uses that equipment for real-time incident response and **does not store video footage from those cameras.**

To request imagery, please fill out the form below and e-mail it to digitalimagingrequest@wsdot.wa.gov

WSDOT has a twenty year retention policy for imagery collected by this program. If you would like to request imagery older than twenty years, contact Washington State Archives at digitalarchives@sos.wa.gov.

Customer Information			
Name		Phone Number	
Email			Date
Firm/Agency			
Imagery Requested			
State Route Number		Milepost Description <i>Example: 121.38 to 122.42</i>	
Year(s) Requested		Direction of Travel (Milepost Values)	Increasing Decreasing Both
Inside Lanes (if available)	Yes	No
