Construction Audit Tracking System

The Washington State Department of Construction Audit Process Control System.

The Construction Audit Tracking System (CATS) is a construction and inspection audit system that will be used by WSDOT for all design build projects and can be applied to all other WSDOT construction, testing and inspection processes. This system will provide a communications process that allows WSDOT and contractors to resolve non-compliance issues found during construction inspections. This system is a new need to WSDOT and does not replace any existing computer systems at the agency.
