**RE:** SEPA Determination

**SUBJECT:** WSDOT Statewide Culvert Maintenance and Repair

WSDOT needs to perform routine maintenance activities, including minor repairs, to culverts within our Right of Way throughout the state. The work includes removal of bedload material, woody and other debris to allow for proper flows through the culvert. Minor repairs involves activities such as repairing washouts adjacent culvert and structural repairs as needed.

Activities will follow the requirements per WSDOT's permits and agreements with the Department of Fish & Wildlife.

We have evaluated these activities and found the work to be consistent with those activities adopted under SEPA on January 1, 2008 through the NEPA DNS issued to WSDOT by NOAA Fisheries for the Regional Road Maintenance Program.
