# TSMO Vision Statement for Southwest Washington

## Transportation System Management and Operations

*promotes better use of the **existing** transportation system, by providing increased accessibility, reliability, and safety for people and freight.*

# TSMO Program Goals

- Provide transportation solutions that advance **regional** transportation goals, economic vitality, and environmental sustainability.
- Promote **operational** policies that are responsive to citizens and agency partners.
- Maximize the value of **existing** and future transportation investments to meet transportation needs.
- Promote **multimodal** and **interagency** cooperation to collaboratively and seamlessly develop, fund, implement, operate, and maintain TSMO programs.
- Deploy integrated and interoperable **Intelligent Transportation Systems** (ITS) technology and communications assets that is shared among agencies.
- Use operations data to continually **measure** and **improve** the quality of the transportation system and operational strategies in the region.
