

## I-405 - NE 10th Street Bridge

### Project Description

WSDOT is partnering with the city of Bellevue to build a new bridge crossing at NE 10th Street in Bellevue. The NE 10th Street Bridge Crossing will be built in two stages:

- The city of Bellevue will complete the first phase in Spring 2008, building the east approach and connection to 116th Avenue NE.
- In February 2008 WSDOT begins construction on the second phase, building the west approach and completing the bridge over I-405. The new bridge crossing allows direct travel across I-405 on NE 10th Street.

### Project Benefits

- **Safety.** Provides drivers and pedestrians a safer, less congested crossing of I-405.
- **Congestion relief.** Reduces congestion on NE 8th Street by spreading traffic to alternate crossings of I-405.
- **Mobility.** Improves access to north downtown Bellevue and to the medical district.

### Project Timeline

**Stage 1** - City of Bellevue expects completion during the second quarter of 2008.

- Construction Start: **2006**
- Construction Complete: **2008**

**Stage 2** - WSDOT will start construction on phase two with the demolition of the Paragon Hotel.

- Construction Start: **2008**
- Open to Traffic: **2009**

The NE 10th Street bridge crossing, along with other downtown Bellevue projects, will provide improved access in the north end of downtown Bellevue, and will relieve congestion at critical I-405 interchanges.

The Paragon Hotel demolition is scheduled to start in early spring 2008 and be completed three to four weeks after the start date.
