

# SR 9 - Safety

Between 2005 and 2012, our projects will significantly enhance safety on the most heavily traveled portion of SR 9. In the last 10 years, traffic between SR 522 and SR 528 has increased by 83 percent and more than 3,000 collisions occurred, with 895 resulting in injuries. We will reduce congestion and make this 19-mile stretch of highway safer by adding lanes, new signals, and raised medians and by improving intersections.

## SR 528 to Bryant Road

Average daily traffic increased by 83 percent between 1994 and 2004, from 6,000 vehicles per day to 11,000 vehicles per day.

## SR 522 to SR 528

Average daily traffic increased 47 percent between 1994 and 2004, from 19,000 vehicles per day to 28,000 vehicles per day.
