

Dual-Faced Portland Cement Concrete Traffic Curb Retrofit

Description of Work

This work consists of constructing dual-faced portland cement concrete curb on existing pavement.

Materials

Materials shall meet the requirements of the following sections:

Portland Cement	9-01
Aggregates	9-03
Premolded Joint Filler	9-04.1
Reinforcing Steel	9-07.2
Resin Bonded Anchor Adhesive	GSP 0221.GR6

Construction Requirements

The existing pavement shall be saw cut and removed to the depth and width shown in the plans. The waste water and slurry produced by the saw cutting operation shall be picked up and properly disposed of off the project site.

Concrete for the curbs shall be air entrained Commercial Concrete in accordance with the requirements of Section 6-02.

Curbs shall be constructed as shown in the plans.

Measurement

Dual-faced portland cement concrete curb retrofit will be measured by the linear foot along the line and slope of the completed curb. The measured length will include the scupper areas. Excavation of the existing pavement shall be incidental to this work.

Payment

Payment will be made in accordance with Section 1-04.1, for the following Bid item:

“Dual-Faced PCC Curb Retrofit”, per linear foot.

All costs for furnishing and installing the resin bonded anchors shall be included in this bid item.
