# Aviation Economic Impact Calculator

**Aviation Economic Impact Calculator**

**Disclaimer**

Welcome to the WSDOT Aviation Economic Impact Calculator. This tool is designed to assist users in estimating an airport's change in regional economic impacts based on potential changes in activity at the airport. The calculations in this tool are high-level estimates designed to give a sense of magnitude of economic impacts, but are not to be taken as specific projections. The tool uses averages and typical ranges to provide a reasonable estimate of impacts based on the types of changes entered, which should not be assumed to be precise calculations.

The base data used in the Calculator comes from the Airport Information System (AIS) database, which consists of airport activity information self-reported by airport managers. It is important to keep in mind that inaccuracies or out of date information in this AIS may result in estimates that are inconsistent with the current state of the airport.

Please read the [instructions](#) carefully to understand the purpose and limitations of the Aviation Economic Impact Calculator.

Please select an airport from the drop down menu. If you are unsure of the official name of an airport or want to look up an airport by its three-letter ID, please refer to page xix of the [Washington State Airport Guide](#) (this link opens a PDF document). The data from the most recent year will be displayed by default.

Airport Name	FAA Site Number	Year	Counties in the Economic Impact Region
Choose an Airport		2010	

**Fuel Sales Offered At Airport**

Changes in Flight Activity | Changes in Business Activity | Changes in Cargo Activity | Capital Projects

**Fuel Sales offered at this airport**

Use this area of the calculator if you want to change the status of fuel sales at this airport.

	Currently	New Scenario
Aviation Gas (AvGas)	No	No
Jet Fuel	No	No

# Statewide Airport Pavement Management

**Washington State Department of Transportation Aviation**  
2012 Pavement Management Program Update

Home | Summary Information | Airport Details | Maintenance Guidelines | Pavement Inspection | Miscellaneous

Approximately every five years, Washington State Department of Transportation (WSDOT) Aviation conducts a system-wide study of pavement to assess the relative condition of pavements for selected Washington airports. The program serves as a tool to identify system pavement needs, shape programming decisions for federal and state grant aid, provide information for legislative decision making, and assist airport sponsors in making informed planning decisions. The program also develops accurate pavement inventories and identifies necessary maintenance, repair, rehabilitation, and reconstruction projects.

This interactive data exchange application (IDEA) presents the results of the 2012 update of the WSDOT Aviation pavement management system. During this project, the runway, taxiway, apron/hangar, and T-hangar pavements at ninety-five selected airports in Washington were assessed by Applied Pavement Technology, Inc. (APTech). The pavement condition data collected as part of independent APMS projects for five additional National Plan of Integrated Airport Systems (NPIAS) airports (Boeing Field (BFI), Seattle-Tacoma International Airport (SEA), Spokane International Airport (EGE), Tri-Cities Airport (PSC) and Yalima Air Terminal (YKM)) were also incorporated into the database. Information on these five airports is only shown in the 'Summary Information' section of the IDEA.

This IDEA is organized into the following modules accessible from the tabs above:

- Summary Information**—View a summary of pavement area, age, and condition information at the statewide level.
- Airport Details**—View detailed inventory information, condition data, work history information, photographs, and the proposed eight-year maintenance and rehabilitation plan for individual airports.
- Maintenance Guidelines**—View general recommendations for pavement maintenance at Washington airports as well as FAA guidelines for pavement maintenance.
- Pavement Inspection**—Review background information on the PCI survey method used to assess pavement condition, and access the Washington pavement inspection report form.
- Miscellaneous**—View definitions of abbreviations used throughout the IDEA, and learn about this program as well as Applied Pavement Technology.

Welcome to Washington State's Airport Information System Provided by WSDOT Aviation

**Airport Information System**

The purpose of this system is to keep accurate, up-to-date information about Washington's air transportation system that is accessible to WSDOT staff, airport sponsors and the FAA. The information is used to support numerous WSDOT programs, including the Airport Aid Grant Program, the Washington Aviation System Plan and the Airport Land Use Compatibility Program. The airport information provided allows WSDOT to accurately describe Washington's air transportation system and communicate aviation needs to communities, local elected officials, the state legislature and the FAA.

WSDOT asks airports to review and update their information once every year. Our staff is available to assist you: please contact our office at (360) 709-8015 or [aisadmin@wsdot.wa.gov](mailto:aisadmin@wsdot.wa.gov) to request support.
