WSDOT has a helpful online training on [ADA Pedestrian Facilities Construction Inspection](#).

This training provides information a field inspector needs to ensure ADA requirements are met during construction.

The training covers:

- Calibration of a smart level.
- Inspection of form work before pouring the concrete.
- Inspection of finished surfaces.
- Placement of a detectable warning surface (DWS).
- Pedestrian traffic control.

If you have any questions or require further clarification, please contact:

Local Agency ADA Specialist, [Akmal Siddiqui](#) or call 360.705.7539
