

## Views Toward the Proposed Alignment Structure

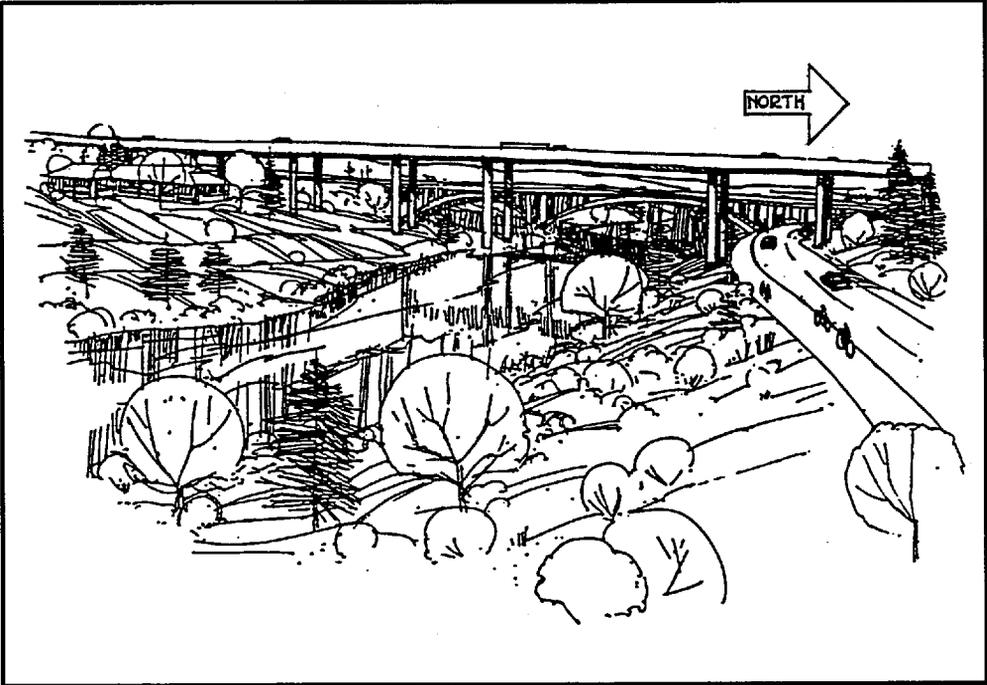

### Alternative 7 - Havana Route

S - Spokane Community College Campus will be physically separated from the Industrial area located Eastward by the proposed raised alignment structure. Low Intactness and Unity will continue. Vividness will improve due to grand scale of the proposed structure.

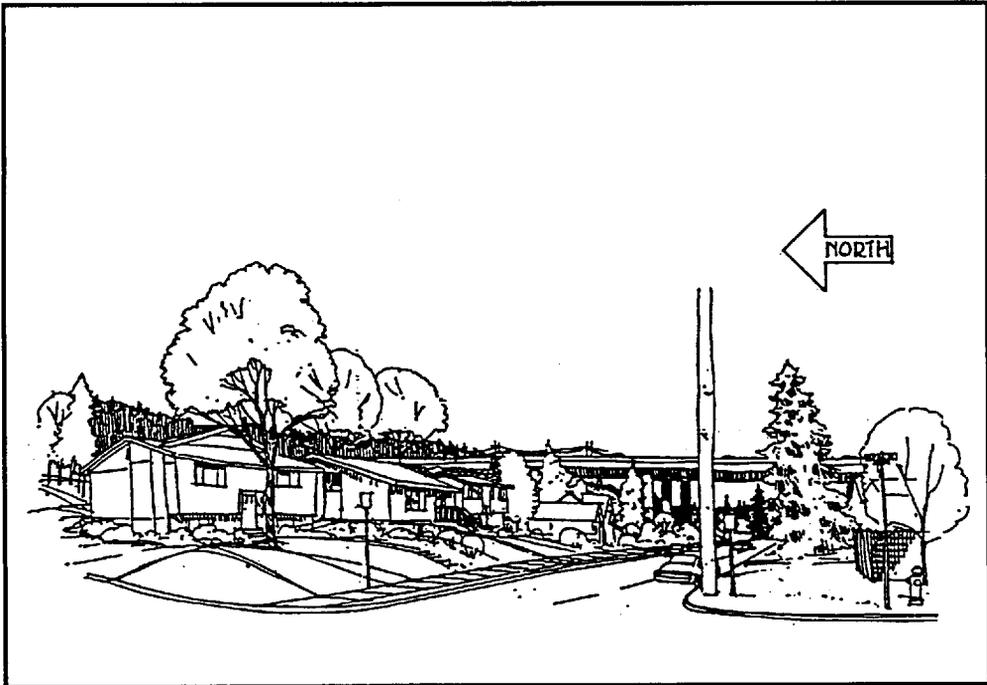

T - Residential neighborhood will be visually separated from the Rural/Utilities area located Eastward (large Wash. Water Power Electric Powerstation) by the proposed raised alignment structure. Low Intactness and Vividness will continue. Proposed Noise barriers at this location may improve Unity within the residential neighborhood.
