Re: ADVERSE Effect

Dear Mr. Archer:

Thank you for contacting the Department of Archaeology and Historic Preservation (DAHP). We have reviewed the cultural resources discipline report you provided for this project. We concur with your determination that the project, as proposed, will have an **adverse effect** on properties that are listed on or eligible for listing on the National Register of Historic Places (NRHP).

Overall, the document is clear, comprehensive, and represents a significant improvement over previous versions of the report that have been presented to our agency. There are a few comments we have on the report as presented:

DAHP Comments on Volume I—Archaeology

- It is unfortunate that none of the BOAS cultural resources reports had been presented to our agency for review at the time of their completion. I believe we would be significantly farther along with the archaeological investigation for the project if we had been working in closer concert with the SR 520 project team to address archaeological issues and the findings submitted to the project team as early as 2005.
- Page 1-2, line 19, this should indicate that this is the Addendum to the “Preliminary” Ethnographic and Geoarchaeological study, not the document that is included as Appendix 2. And why do all of the BOAS reports (Appendixes 1, 2, and 3) have identical Report Nos.?
- The ethnographic discussion that appears on page 2-15 should either synthesize information from the reports attached as appendixes or should direct the reader to the appendixes.
- We concur with the strategy described in Chapter 6 for moving forward and look forward to the development of the Programmatic Agreement as well as the Treatment Plan.

DAHP Comments on Volume II—Built Environment

- Exhibit 6-2 in Vol II presents a list of those properties that would be affected by the undertaking. However, the table is somewhat confusing since it deals exclusively with diminution of integrity while not addressing the nature of the impact. If you're going to attempt to tabularize data that is later presented in the narrative, the tabular data needs to be comprehensive. For example, the table should more clearly indicate that the Governor Albert D. Rosellini (Evergreen Point) Bridge will be removed, rather than having its integrity "permanently diminished."
- The removal of structures at 2904 and 2908 Montlake Boulevard NE, as well as the planting strips along Montlake Boulevard, should be called out specifically in Exhibit 6-2. In general, any resources that are targeted for removal should be called out in the Exhibit 6-2.
- The report is unclear regarding the impacts/effects to the 6f properties along Rainier Avenue.
- For the various mitigation ideas presented in Chapter 8, it would appear that there are some incorrect references cited regarding what level of DAHP mitigation might be used and whether an actual National Register nomination would be developed.

We look forward to further consultation and the development of the Programmatic Agreement to address this adverse effect.

As always, we appreciate receiving any correspondence or comments from concerned tribes or other parties that you receive as you consult under the requirements of 36CFR800.4(a)(4). These comments are based on the information available at the time of this review and on behalf of the State Historic Preservation Officer pursuant to Section 106 of the National Historic Preservation Act and its implementing regulations 36CFR800.

Thank you for the opportunity to review and comment. If you have any questions, please contact me.

Sincerely,

Matthew Sterner, M.A.

Property: Delmar Drive East Properties
Re: Re-Evaluation

Dear Mr. Archer:

Thank you for contacting our office and supplying the additional information regarding the five properties on Delmar Drive East.

After careful evaluation I have made the following assessments:

- 2320 Delmar Drive E – Property still Not Eligible due to low integrity of the resource, and unconfirmed history & association with architect.
- 2328 Delmar Drive E – Eligible under criteria C for its association to various well-know mid-century architects.
- 2340 Delmar Drive E - still Eligible, as called out as such on initial evaluation.
- 2344 Delmar Drive E - Property still Not Eligible due to low integrity of the resource (can not get a clear picture of dwelling with submitted images), and unconfirmed history & association with architect.
- 2448 Delmar Drive E – Eligible under criteria B for its association to Hellmut Wilhem.

These comments are based on the information available at the time of this review and on behalf of the State Historic Preservation Officer pursuant to Section 106 of the National Historic Preservation Act and its implementing regulations 36CFR800.

Thank you for the opportunity to review and comment. Should you have any additional questions, please feel free to contact me.

Sincerely,

Re: Urban Partnership Agreement Variable Tolling Project (Corrected Copy)

Dear Ms. Walker Gray:

Thank you for contacting the Washington State Department of Archaeology and Historic Preservation (DAHP). The above referenced project has been reviewed on behalf of the State Historic Preservation Officer under provisions of Section 106 of the National Historic Preservation Act of 1966 (as amended) and 36 CFR Part 800. My review is based upon documentation contained in your communication.

I concur with the area of potential effect (APE) as defined on Page One of the Cultural Resources Survey (08-37) dated December 22, 2008.

I note from our records that it appears that DAHP has not previously officially commented on the eligibility of the SR520, Evergreen Point (Albert D. Rosellini) Bridge. In our opinion, the bridge is eligible for the National Register of Historic Places under Criterion C, Criteria Consideration G.

In addition, I concur that the current project as proposed will have "NO ADVERSE EFFECT" on the National Register eligible property. If additional information on the project becomes available, or if any archaeological resources are uncovered during construction, please halt work in the area of discovery and contact the appropriate Native American Tribes and DAHP for further consultation.

Thank you for the opportunity to review and comment. Should you have any questions, please contact me.

Sincerely,

Stephen A. Mathison
Historical Architect

**Re: SR 520 Bridge Replacement and HOV Project
Seattle, King County, Washington
Area of Potential Effects (APE)**

Dear Dr. Brooks:

Per provisions of 36 CFR 800.3(a), the Federal Highway Administration (FHWA), Washington State Department of Transportation (WSDOT), and Sound Transit are proposing an undertaking to address an identified transportation need in Seattle, King County, Washington. The SR 520 bridges are vulnerable to earthquakes and windstorms and must be replaced. The Bridge Replacement and HOV Project will replace the SR 520 bridges, and include other transit, HOV and community enhancements.

The SR 520 Bridge Replacement and HOV project is one component of the SR 520 Program. The other projects within the program are: SR 520 Eastside Transit and HOV Project, Pontoon Construction Project, and Lake Washington Urban Partnership. The project described in this letter extends from the SR 520 interchange with I-5 to 92nd Avenue NE in Yarrow Point. The project would tie in to the Eastside Transit and HOV Project at Evergreen Point Road; restriping would occur from Evergreen Point Road to 92nd Avenue NE.

Project Description

A Draft EIS published in August 2006 evaluated No Build, 4-Lane, and 6-Lane alternatives for the SR 520 corridor. The SR 520 Bridge Replacement and HOV project being evaluated in a Supplemental Draft EIS (SDEIS) is a 6-Lane Alternative that would rebuild SR 520 between I-5 and Medina, including replacement of the Evergreen Point Bridge across Lake Washington. The SDEIS currently underway will evaluate three design options for the 6-Lane Alternative in Seattle that were developed by a mediation group in 2007 and 2008, in addition to the No Build Alternative. The mediation group

included elected officials, local, federal and state agencies, neighborhood representatives, local organizations and WSDOT. This process focused on west side interchange options and how each design option might affect neighborhoods, traffic, and the environment. Mediation participants also considered the effects to the Washington Park Arboretum and the University of Washington.

The mediation group developed three designs that were included in their 2008 project impact plan and WSDOT will further analyze all three in a NEPA Supplemental Draft EIS consistent with the WSDOT environmental process. The most significant differences are located in the vicinity of the Montlake neighborhood, and figures of the three options in this area are included in Appendix A of this submission. Appendix A also includes a schematic vicinity map. The three designs are:

- **Option A** - Most similar to today's configuration, with the addition of a second Montlake drawbridge over the Montlake Cut (Option A figure).
- **Option K** - Includes a tunnel under the Montlake Cut and a single point urban interchange below the SR 520 roadway (Option K figure).
- **Option L** - Includes a diagonal drawbridge over the Montlake Cut and a single point urban interchange above the SR 520 roadway (Option L figure).

Elements common to each option include:

- Two general-purpose lanes and one HOV lane in each direction (6-Lanes between I-5 and Medina).
- A bicycle and pedestrian path on the north side of SR 520.
- A reversible direct HOV access ramp at the I-5/SR 520 connection.
- Variable speed signs.
- Lids at I-5, 10th Avenue E and Delmar Drive E

More details about each design option are available on the Program's webpage:

<http://www.wsdot.wa.gov/Projects/SR520Bridge/brhpdesign.htm>

Area of Potential Effects (APE)

Pursuant to compliance with Section 106 of the National Historic Preservation Act (NHPA), we are consulting with your office about the SR 520 Bridge Replacement and HOV Project. Enclosed (Appendix B) please find maps that illustrate the proposed APE for this project. The proposed APE includes all known areas of impact for all three (3) design options, which includes bridges, tunnels, roadway widening, several intersection improvements that include roadway widening, lids, and ADA-approved pedestrian walkways and upgrades, and known staging, temporary storage, and storm water

management facilities. If there are any changes to the project, we will notify your office and provide additional information, including revised APE maps.

Built Environment

The APE for this project includes one parcel on either side of all areas of impact and ground disturbance. This approach is consistent with the APE determination for the former SR 520 project, with which your office concurred in 2005. For areas where only restriping will occur, such as on parts of Interstate-5, we are only including the highway right-of-way. The APE will account both for direct and indirect effects to historic properties. Direct effects may include demolition and alteration to historic properties, while potential indirect effects can be both during construction and subsequent operations, caused by noise, dust and dirt, vibration, change of setting, or other factors. All historic buildings, structures, sites, objects, and districts constructed prior to 1971 will be evaluated and documented. Further, based on our ongoing consultation with your office, we have included the Washington Park Arboretum in the APE, and will determine eligibility and project effects, both positive and negative, as part of our evaluation

Electronic copies of Historic Property Inventory Database forms will be prepared for all properties that have not been surveyed within the last five years. Any properties surveyed within the last five years will be checked in the field to verify condition and integrity. Database inventory forms will be updated as necessary.

Archaeological Resources

Archaeological sites could be disturbed directly or destroyed by the project within the portion of the APE where construction activities will occur. Therefore, WSDOT has delineated a limits-of-construction (combined-option) to consider potential direct effects to archaeological historic properties. WSDOT plans to continue archaeological investigations to examine all areas either not included in the APE defined for the Draft EIS (2006), or purposefully not included at that time pending more detailed design plans that specifically identified ground disturbance locations (Foster Island). WSDOT intends to use background research, ethnographic study, field investigations, and evaluation of the project area's geomorphology over time to identify archaeological historic properties and to assess the probability of encountering subsurface archaeological remains within the limits of construction. If encountered, archaeological sites will be recorded on DAHP archaeological site inventory forms.

Much of the construction portion of the APE was subjected to subsurface investigations during the Draft EIS process. Only one archaeological site, the Miller Street Landfill (45KI760), was identified. Foster Island is known to have been a burial ground of local Lakes Duwamish Indians, and has been identified as a culturally sensitive landform.

WSDOT plans to use geophysical remote sensing, possibly other sophisticated techniques, and traditional archaeological investigations to identify potential burials on the Island (if present) in order to avoid or greatly minimize disturbance to them.

The archaeological portion of the APE also includes a vertical element in order to consider all potential effects from ground disturbance. The vertical APE is defined as either the full vertical limit of proposed construction, or the depth to consolidated glacial sediments, whichever is shallower. The latter part of the definition assumes that glacial sediments either pre-date all human occupation in the Puget Sound region, or would have been deposited after ice sheets scoured the landform and removed any physical evidence of pre-glacial human occupation.

Other Consulting Parties

Per 36 CFR 800.2(c)(2), WSDOT and FHWA presently are consulting with five Native American tribes, including the Muckleshoot Indian Tribe, the Suquamish Tribe, the Snoqualmie Tribe, the Tulalip Tribes, and the Yakama Nation. We also are consulting with the non-federally recognized Duwamish Tribal Community. All tribes and tribal organizations, except for the Yakama Nation, have shown strong interest in the project and the SR 520 Program, and are actively involved with consultation. WSDOT will forward to you all correspondence we receive from tribes regarding this project.

Because of the size and scope of this project, WSDOT has contacted several groups to participate as Section 106 consulting parties for this project, per provisions in 36 CFR 800.2(c)(5)(d)(i). In a letter dated March 2, 2009, the SR 520 project team invited several agencies, groups, and organizations to participate as consulting parties, and asked these parties to acknowledge their interest by March 18, 2009. As of today, the following groups have accepted (in writing or by phone) the invitation to participate in the Section 106 process as consulting parties:

- Washington Trust for Historic Preservation
- Eastlake Community Council
- Historic Bridge Foundation
- University of Washington
- Montlake Community Club
- Seattle Yacht Club
- Docomomo WEWA
- Historic Seattle
- Portage Bay/Roanoke Park Community Council

The City of Seattle Department of Neighborhoods, Historic Preservation Office is also a Section 106 consulting party, since the City of Seattle is a Certified Local Government (CLG). As consulting parties, these organizations will have the opportunity to comment on the APE, identification of historic properties within the APE, and the determination of adverse effects to historic properties. Further, they will be invited to participate in

developing measures to mitigate adverse effect to historic properties, if any are necessary. These organizations will be allotted a 30 day review period to comment.

Continuing Consultation

The APE includes all known structures scheduled for demolition (such as on- and off-ramps), as well as known detours, shooflies, staging, and laydown areas. However, not all locations have been selected at this point. We will certainly consider these areas to be within the APE once they have been determined.

Thank you for your time and attention to this project. We look forward to continuing consultation with your office on this project, and to your comments on our proposed APE. We respectfully request your comments by May 7, 2009. If you have any questions, please do not hesitate to contact me at 206-464-1236, email juellk@wsdot.wa.gov, or Connie Walker Gray, UCO Architectural Historian, at 206-716-1138, email grayc@wsdot.wa.gov.

Sincerely,

Connie Walker Gray
WSDOT Architectural Historian
