

To Whom It May Concern:

Subcontractor Listing Updates – Form 272-015 Updated

As a result of the passage of [Engrossed Senate Bill 5457](#), WSDOT has made changes to Form 272-015 the [Subcontractor List](#) and associated Contract Provisions.

Changes signed into law on March 25, 2020 by the Governor now require that in addition to listing electrical, HVAC and plumbing subcontractors, prime contractors must also list structural steel installers and steel rebar installers.

The law goes into effect on June 11, 2020 and all contracts advertised after that day estimated at \$1 million or more will be subject to the change. Contracts advertised before that date do not require the additional listing. During the transition, WSDOT will accept bids on either form as long as the correct occupations are listed per the individual requirements of each contract. Please refer to your Contract Provisions. You may refer to your bid proposal to ensure that you are providing the correct form.

A draft of the revised form follows on the next page. The revised contract language reads:

Item number 1 in the fifth paragraph of Section 1-02.6 is revised to read:

(June 4, 2020)

1. Subcontractors who will perform the work of structural steel installation, rebar installation, heating, ventilation and air conditioning, plumbing as described in RCW 18.106 and electrical as described in RCW 19.28, and

You can view the complete [Revised Code of Washington \(RCW\) 39.30.060](#) online.

If you have questions, please contact us at CAA@wsdot.wa.gov or call 360-705-7835.

To Be Submitted with the Bid Proposal

Project Name _____

Failure to list subcontractors with whom the bidder, if awarded the contract, will directly subcontract for performance of the work of structural steel installation, rebar installation, heating, ventilation and air conditioning, plumbing, as described in Chapter 18.106 RCW, and electrical, as described in Chapter 19.28 RCW or naming more than one subcontractor to perform the same work will result in your bid being non-responsive and therefore void.

Subcontractor(s) with whom the bidder will directly subcontract that are proposed to perform the work of structural steel installation, rebar installation, heating, ventilation and air conditioning, plumbing, as described in Chapter 18.106 RCW, and electrical as described in Chapter 19.28 RCW must be listed below. The work to be performed is to be listed below the subcontractor(s) name.

To the extent the Project includes one or more categories of work referenced in RCW 39.30.060, and no subcontractor is listed below to perform such work, the bidder certifies that the work will either (i) be performed by the bidder itself, or (ii) be performed by a lower tier subcontractor who will not contract directly with the bidder.

* Bidder's are notified that it is the opinion of the enforcement agency that PVC or metal conduit, junction boxes, etc, are considered electrical equipment and therefore considered part of electrical work, even if the installation is for future use and no wiring or electrical current is connected during the project.
