1. All edges of bridge approach slab shall have 3" radius.

2. Longitudinal joints shall be placed on lane lines and shall be constructed and sealed in accordance with STX Spec. Section 5-08.2(b). Joints may be either a saw cut crack control joint or a construction joint. Saw cut joints shall terminate 1'-0" before reaching edge of slab and must be saw cut as soon as possible after placement of concrete.

- Bridge approach slabs less than 40' wide - no joint required.
- Bridge approach slabs wider than 40' - one or more joints are required to divide the slab into approximately 2' wide sections.

NOTE: All dimensions are out to out.
