PEDESTRIAN and BICYCLE & SAFE ROUTES TO SCHOOL PROGRAMS

Status Report for the Washington State Legislature

Introduction

The Washington State Department of Transportation is pleased to present the status report for the Pedestrian and Bicycle and Safe Routes to School programs as required in ESB 5096, Section 311(3). The programs were created in 2005, (ESSB 6091) and funding requests have consistently exceeded funding amounts provided. These programs provide funding for facilities that improve pedestrian and bicycle safety and mobility. Also, the programs help to further several of WSDOT's strategic goals, through deliberate investments that advance modal integration and enhance community engagement through stakeholder collaboration. The programs provide funding to cities, counties, tribal nations, state agencies, and other public agencies to support pedestrian and bicycle projects within their respective communities.

Pedestrian and Bicycle Program – Status

The purpose of the Pedestrian and Bicycle Program is to improve the transportation system to enhance safety and mobility for people who chose to walk and bike. Since 2005, approximately \$73 million has been made available for 158 projects across the state. That includes \$18 million in state funds awarded to 26 projects for the 2017-2019 biennium. To date, 91 projects have been completed and two cancelled.

Safe Routes to School Program – Status

The purpose of the Safe Routes to School Program is to increase the number of children walking and biking to school safely. Since 2005, almost \$89 million has been made available for 215 projects across the state. That includes the \$19 million in state and federal funds awarded to 33 projects in the 2017-2019 biennium. To date, 126 Safe Routes to School projects are complete and one cancelled.

The tables below include an updated list of Pedestrian and Bicycle Program (Table 1 – p. 3-8) and Safe Routes to School Program (Table 2 – p. 9-17) projects that are completed, underway and/or approved for funding. It does not include closed projects reported in previous reports. For more detailed information about these and other state and federal transportation projects administered by WSDOT Local Programs visit the [WSDOT Local Programs Project Status Dashboard](#).

WSDOT Active Transportation Division expects to announce the next call for projects for both programs in early 2018.
