NOTES

1. Pole labels shall be applied three feet from the base of the pole, as measured to the bottom of the label. The label shall be oriented at a 45 degree angle towards adjacent oncoming traffic.

2. Characters shall be 4 inch tall block gothic letters and numbers. Letters shall be painted on using enamel alkyl gloss paint conforming to Federal Specification TT-E-489. Labels shall be black in color, with the exception of labels for colored poles (black, brown, or green poles) which shall use white labels.

3. Service numbers shall not include the prefix letters (SXX).

4. Service voltage shall read 120, 240, or 480 as applicable.

5. Type III and Type V signal standards with luminaires installed shall be labeled.
