NOTES

1. Centerline Rumble Strip installation requires a minimum distance of 12 feet from centerline to edge of paved shoulder.

2. When directed by the Engineer, rumble strips may be installed along the turn pocket taper where there is a history of rear-end collisions in the turn pocket.

3. Increase depth of rumble strips by 1/8" (in) on routes where Bituminous Surface Treatment is normally applied. See contract plans for areas requiring the increased depth.
