What is the current distribution of HSIP funds? Safety: Federal Highway Safety Improvement Program (HSIP) funding provided to the state is split based upon fatal and serious injury crash data on state and local facilities. The HSIP funds are used to implement engineering countermeasures which reduce fatal and serious injury crashes. WSDOT manages the Local Federal Safety program and provides more than $24 million annually for improvements on local facilities. WSDOT prioritizes the improvements on state and local facilities based on crash data and benefit-cost analysis. The HSIP is one component of WSDOT’s total annual expenditure on safety projects. WSDOT uses additional funds from other federal and state resources each year, averaging over $15 million since 2013.

Data collection

MAP-21 requires fatal data from the Washington State Traffic Safety Commission’s (WSTSC) Fatality Analysis Reporting System (FARS) and serious injury data from WSDOT’s system. State law enforcement officers record crash events in The Washington State Police Traffic Collision Report. This report is the sole source for all WSDOT serious injury data and most FARS data, with few exceptions.

MAP-21 requires Vehicle Miles Traveled (VMT) data from WSDOT’s Highway Performance Monitoring System. Along with the number of fatalities or serious injuries, VMT is used to calculate the rate of fatalities or serious injuries per 100 million VMT.

WSDOT’s serious injury data and FARS fatality data for the previous calendar year is preliminarily available in about February and April of the following year, respectively. WSDOT’s VMT data is available about June of the following calendar year.

Purpose of reporting requirements

In July 2012, the Moving Ahead for Progress in the 21st Century Act (MAP-21) became law. The primary objectives of MAP-21 are to increase the transparency and accountability of states for their investment of federal taxpayer dollars into transportation infrastructure and services nationwide, and to ensure that states invest money in transportation projects that collectively make progress toward the achievement of national goals. The new rules will require reporting performance on the following areas: Safety; Pavement and Bridge; System Performance, Freight, and Congestion Mitigation and Air Quality.

For more information

MAP-21 safety requirements information: John Milton, Director of Transportation Safety and Systems Analysis (360) 704-6803 or Milton.J@mводot.wa.gov

Traffic crash fatal and serious injury data: Mike Bernard at (360) 570-2454, Bernie@Mводot.wa.gov. Data is protected by U.S. Code 23 §148 and §409, but can be requested.

For more information about the reporting requirements, see the official Target Setting Guide located on the WSDOT website.

OFFICIAL TARGETS

Moving Ahead for Progress in the 21st Century Act - Final rules on traffic safety performance management

The U.S. Department of Transportation has issued two interrelated final rules governing traffic safety and safety-oriented performance management which became effective on April 14, 2016. These two rules are referred to in this folio as

- Rule #1 - Safety Performance Measures rule; (23 CFR §490)
- Rule #2 - Highway Safety Improvement Program (HSIP) rule; (23 CFR §924)

Both final rules relate to highway safety, the primary objective being to significantly reduce fatal and serious-injury crashes on all public roads. The Safety Performance Measures rule (Rule #1) also includes the goal of reducing traffic fatalities of and serious injuries to people using non-motorized transportation modes, namely bicyclists and pedestrians.

Safety Performance Reporting

Rule #1 specifies the performance management measures for safety, and defines the target setting process for State DOTs and Metropolitan Planning Organizations (MPOs). Per Rule #2, State DOTs will establish and report their safety targets and progress toward these targets in an annual Highway Safety Improvement Program (HSIP) report.

Note: More information about the reporting requirements can be found in the Target Setting Guide located on the WSDOT website.

Summary of required performance measures

Rule #1 requires all State DOTs to report targets and performance with respect to the following safety performance measures:

- No. 1 - Number of fatalities on all public roads (due July 1/Aug. 31)
- No. 2 - Number of fatalities per 100 million vehicle miles traveled (VMT) on all public roads (due July 1/Aug. 31)
- No. 3 - Number of serious injuries on all public roads (due July 1/Aug. 31)
- No. 4 - Number of serious injuries per 100 million VMT on all public roads (due Aug. 31)
- No. 5 - Number of non-motorist fatalities and serious injuries on all public roads (e.g. bicyclists and pedestrians) (due Aug. 31)

Optional targets: States have the option to set additional targets for the performance measures for any number and combination of urbanized area boundaries, as well as for a single non-urbanized area. If optional targets are set, they will be not assessed when determining significant progress, and states will not incur penalties if they fail to show progress.

Overlapping measures/targets in the Highway Safety Plan: Targets for Measures No. 1-3 must also be reported to the National Highway Traffic Safety Administration by July 1 of each year. They must be numerically identical targets to those reported for MAP-21 compliance on August 31 as part of the HSIP. See the Timelines section inside for details.

MAP-21 Special Rules: Numeric targets are not required, but states must report performance in these two categories, and show improvement compared to baseline.

- Fatality rate on High Risk Rural Roads (due Aug. 31)
- Number of fatalities and serious injuries of drivers and pedestrians age 65 and older on all public roads (due Aug. 31)
FHWA provides flexibility for safety target setting under MAP-21
State DOTs and MPOs have flexibility in setting numeric targets for the five performance measures identified in Rule #1. It does place stipulations on certain aspects of the process, however. It requires that states and MPOs report their performance metrics and targets for each of five performance measures as rolling 5-year averages. Per Rule #2, states are also required to develop a Strategic Highway Safety Plan (SHSP). Washington state’s plan is called Target Zero, which can be used as the foundation for the target setting process (http://www.targetzero.com).

WSDOT’s target adoption
For the 2020 annual target setting process, WSDOT and its partners adopted the Target Zero approach for MAP-21 using the 2019 updated Target Zero plan produced via this method (see table below).

MAP-21 Safety Target Setting
Five-year rolling averages; number of persons, or number of persons per 100 million VMT 2018 Baselines 2020 Official Targets 
Statewide MAP-21 Target (Target Zero) 
No. 1 - Fatalities 531.8 443.2 
No. 2 - Fatality rate 0.879 0.732 
No. 3 - Serious injuries 2,554.6 1,795.5 
No. 4 - Serious injury rate 3.562 2.968 
No. 5 - Non-motorist fatalities & serious injuries 569.8 466.5 

FHWA’s “Significant Progress” measurement
At the end of each reporting period, FHWA will determine whether a state has made overall “significant progress” toward achieving its safety targets. The penalties listed on the back page of this issue can be applied to the state DOT if FHWA deems it has not made that progress. For example, in the graph for Measure No. 1, Washington must lower the 5-year average to fewer than 531.8 fatalities (the baseline value) to achieve significant progress in that measure.

WSDOT uses Target Zero to reduce traffic fatalities and serious injuries
Due to long-term traffic fatalities reductions in Washington coupled with a recent rise in the number of fatalities, WSDOT may not achieve overall significant progress toward these targets. WSDOT and its partners concur that Target Zero should be consistently used to move Washington forward with traffic and serious injury reductions. WSDOT will continue to monitor spending levels and penalty consequences to assess risk and the impacts of this target setting approach.

The general process for generating trend and target information as prescribed by Rule #1 proceeds as follows:
- The annual number of fatalities, serious injuries, and Vehicle Miles Traveled (VMT) is determined for a 10-year period.
- A 5-year rolling average is calculated for each performance measure. For example, for the graph in Measure No. 1, data from 2006-2010 creates the value of the rolling average in 2010—535.4 fatalities. Data from 2007-2011 creates the next rolling 5-year average in 2011.
- The rolling 5-year average value for 2018 will be set at the baseline performance (annual average of 2014 through 2018).
- The state is then free to develop targets using any variety of database methods. In Target Zero and Washington state’s particular approach to target setting, the method to establish targets continues:
  - A straight line will be drawn from the baseline value to a zero value in 2030. (The line is redrawn with each new year of data.)
  - The value of the Target Zero trendline in 2020 becomes the target for the performance measure in 2020.

Timelines
For MAP-21 compliance, all five statewide targets were reported to FHWA by the HSIP deadline of August 31, 2019. MPOs have until February 28, 2020 (160 days after the HSIP reporting deadline) to either agree to plan and program projects so they contribute toward the accomplishment of the State DOT HSIP targets, or commit to a quantifiable target for their Metropolitan Planning Area. In Washington state, MPOs have agreed to adopt the WSDOT targets. In December 2019, the FHWA will make its first determinations of significant progress toward achieving 2018 targets. They will notify states of the outcome in March 2020.

If either of these conditions is met, the state has made significant progress for that individual measure. It must do so in any four of the five measures to have made significant progress overall and avoid the penalty provisions. For example, in the graph for Measure No. 1, Washington must lower the 5-year average to fewer than 531.8 fatalities (the baseline value) to achieve significant progress in that measure.

About these graphs
These graphs display the final 2020 targets for each of the five MAP-21 safety performance measures, and show targets developed by WSDOT in coordination with Washington State Traffic Safety Commission.
