Contents

Chapter 1  Geotechnical Operations and Administration ......................... 1-1
  1.1  Scope of Geotechnical Design, Construction, and Maintenance Support .......... 1-1
  1.2  Role of Offices Providing In-House Geotechnical Design, Construction, and Maintenance Support .......................................................... 1-3
  1.3  Geotechnical Support within the WSDOT Project Management Process (PMP) .... 1-10
  1.4  Geotechnical Report Review Process, Certification and Approval Requirements ...... 1-14
  1.5  Reports Produced by Consultants or other Agencies for WSDOT ................ 1-18
  1.6  Geotechnical Consultant Administration ........................................ 1-19
  1.7  Geotechnical Information Provided to Bidders ..................................... 1-21
  1.8  Sample Retention and Chain of Custody .......................................... 1-23
  1.9  Geotechnical Design Policies and their Basis ..................................... 1-23
  1.10 Geotechnical Construction Support Policies ....................................... 1-25
  1.11 Geotechnical Construction Submittal Review Policies .......................... 1-27
  1.12 References ............................................................................. 1-29
  Appendix 1-A  Preliminary Geotechnical Engineering Services Scope of Work ...... 1-A-1
  Appendix 1-B  Geotechnical Engineering Services Scope of Work for PS&E-Level Design .......................................................... 1-B-1

Chapter 2  Project Geotechnical Planning .............................................. 2-1
  2.1  Overview ............................................................................. 2-1
  2.2  Preliminary Project Planning .......................................................... 2-1
  2.3  Development of the Subsurface Exploration Plan ................................... 2-8
  2.4  Development of the Laboratory Testing Plan ....................................... 2-15
  2.5  References ............................................................................. 2-16
  Appendix 2-A  Field Exploration Request Form ...................................... 2-A-1
Chapter 3  Field Investigation ................................................................. 3-1
3-1  Overview ................................................................................. 3-1
3-2  Activities and Policies – Before Exploration ................................. 3-1
3-3  Activities and Policies – During Exploration .................................. 3-7
3-4  Activities and Policies – After Exploration ..................................... 3-10
3-5  Standard Penetration Test (SPT) Calibration .................................. 3-11
3-6  References .............................................................................. 3-12
3-7  Appendices ............................................................................ 3-12
Appendix 3-A  Daily Drill Report Form .............................................. 3-13
Appendix 3-B  Portable Penetrometer Test Procedures ......................... 3-14
Appendix 3-C  Field Investigation Best Management Practices for Erosion and Spill Prevention .......................................................... 3-21
Appendix 3-D  Department of Natural Resources Memorandum of Understanding: Drilling Operations – State Owned Aquatic Lands ............ 3-23
Appendix 3-E  Geotechnical Field Investigation and Contaminated Drilling Waste Management Procedures ................................................. 3-29
Appendix 3-F  State Materials Laboratory Sample- Handling Policy for Contaminated and Potentially Contaminated Samples ..................... 3-30
Appendix 3-G  WSDOT Well Tracking Database Information to be Tracked ........ 3-33

Chapter 4  Soil and Rock Classification and Logging ................................. 4-1
4.1  Overview .............................................................................. 4-1
4.2  Soil Classification .................................................................... 4-1
4.3  Rock Classification .................................................................. 4-9
4.4  References ............................................................................ 4-17
Appendix 4-A  Test Boring Legend ...................................................... 4-A-1
Chapter 5  Engineering Properties of Soil and Rock ........................................ 5-1
  5.1  Overview .................................................................................................. 5-1
  5.2  The Geologic Stratum as the Basis for Property Characterization ............... 5-1
  5.3  Influence of Existing and Future Conditions on Soil and Rock Properties .... 5-2
  5.4  Methods of Determining Soil and Rock Properties .................................. 5-2
  5.5  In-Situ Field Testing ............................................................................. 5-3
  5.6  Laboratory Testing of Soil and Rock ..................................................... 5-6
  5.7  Back-Analysis Based on Known Performance or Failure ......................... 5-9
  5.8  Engineering Properties of Soil .............................................................. 5-11
  5.9  Engineering Properties of Rock ............................................................ 5-14
  5.10 Determination and Use of Soil Cohesion ............................................... 5-15
  5.11 Final Selection of Design Values ......................................................... 5-16
  5.12 Selection of Design Properties for Engineered Materials ...................... 5-21
  5.13 Properties of Predominant Geologic Units in Washington ....................... 5-24
  5.14 Application of the Observational Method to Adjust Design Properties .... 5-42
  5.15 References ......................................................................................... 5-42

Chapter 6  Seismic Design ........................................................................ 6-1
  6-1  Seismic Design Responsibility and Policy ............................................. 6-1
  6-2  Geotechnical Seismic Design Considerations ....................................... 6-7
  6-3  Seismic Hazard and Site Ground Motion Response Requirements ........... 6-17
  6-4  Seismic Geologic Hazards .................................................................... 6-27
  6-5  Input for Structural Design ................................................................... 6-48
  6-6  References ........................................................................................... 6-57
  6-7  Appendices .......................................................................................... 6-63
      Appendix 6-A  Site Specific Seismic Hazard and Site Response ................. 6-A-1
      Appendix 6-B  High Resolution Seismic Acceleration Maps ..................... 6-B-1

Chapter 7  Slope Stability Analysis ............................................................... 7-1
  7.1  Overview ............................................................................................... 7-1
  7.2  Development of Design Parameters and Other Input Data for Slope Stability Analysis ......................................................... 7-1
  7.3  Design Requirements ........................................................................... 7-2
  7.4  Resistance Factors and Safety Factors for Slope Stability Analysis .......... 7-4
  7.5  References ........................................................................................... 7-5
Chapter 8  Foundation Design ......................................................... 8-1
  8.1 Overview .............................................................................. 8-1
  8.2 Overall Design Process for Structure Foundations ........................ 8-1
  8.3 Data Needed for Foundation Design ........................................... 8-5
  8.4 Foundation Selection Considerations ...................................... 8-9
  8.5 Overview of LRFD for Foundations ........................................... 8-10
  8.6 LRFD Loads, Load Groups and Limit States to be Considered .... 8-11
  8.7 Resistance Factors for Foundation Design – Design Parameters .... 8-18
  8.8 Resistance Factors for Foundation Design – Service Limit States .. 8-19
  8.9 Resistance Factors for Foundation Design – Strength Limit States .. 8-19
  8.10 Resistance Factors for Foundation Design – Extreme Event Limit States 8-19
  8.11 Spread Footing Design .......................................................... 8-20
  8.12 Driven Pile Foundation Design ............................................... 8-27
  8.13 Drilled Shaft Foundation Design ............................................ 8-41
  8.14 Micropiles ........................................................................... 8-46
  8.15 Proprietary Foundation Systems ............................................ 8-46
  8.16 Detention Vaults .................................................................. 8-46
  8.17 References ............................................................................ 8-48
    Appendix 8-A  Approved Proprietary Foundation Systems (Vacant) ... 8-A-1
    Appendix 8-B  Approved AASHTO LRFD Bridge Design Specifications Drill Shaft Design Provisions ... 8-B-1

Chapter 9  Embankments ................................................................. 9-1
  9.1 Overview and Data Needed ..................................................... 9-1
  9.2 Design Considerations .......................................................... 9-6
  9.3 Stability Mitigation ............................................................... 9-15
  9.4 Settlement Mitigation ............................................................ 9-28
  9.5 Construction Considerations and PS&E Development ................. 9-30
  9.6 References ............................................................................ 9-38
    Appendix 9-A  Examples Illustrating Staged Fill Construction Design ... 9-A-1
# Contents

## Chapter 10  Soil Cut Design

10.1 Overview and Data Acquisition ........................................ 10-1  
10.2 Overall Design Considerations ................................... 10-5  
10.3 Soil Cut Design ......................................................... 10-6  
10.4 Use of Excavated Materials ....................................... 10-11  
10.5 Special Considerations for Loess ........................................ 10-12  
10.6 PS&E Considerations ...................................................... 10-19  
10.7 References .................................................................... 10-20  
  
Appendix 10-A Washington State Department of Transportation Loess Slope Design Checklist ........................................ 10-A-1

## Chapter 11  Ground Improvement

11.1 Overview ...................................................................... 11-1  
11.2 Development of Design Parameters and Other Input Data for Ground Improvement Analysis ........................................ 11-2  
11.3 Design Requirements ......................................................... 11-3  
11.4 References .................................................................... 11-3

## Chapter 12  Rock Cut Design

12.1 Overview ...................................................................... 12-1  
12.2 Development of Design Parameters and Other Input Data for Rock Cut Stability Analysis ........................................ 12-1  
12.3 Design Requirements ......................................................... 12-1  
12.4 References .................................................................... 12-1

## Chapter 13  Landslide Analysis and Mitigation

13.1 Overview ...................................................................... 13-1  
13.2 Development of Design Parameters and Other Input Data for Landslide Analysis ........................................ 13-1  
13.3 Design Requirements ......................................................... 13-1  
13.4 References .................................................................... 13-1

## Chapter 14  Unstable Rockslope Analysis and Mitigation

14.1 Overview ...................................................................... 14-1  
14.2 Development of Design Parameters and Other Input Data for Unstable Rockslope Analysis ........................................ 14-1  
14.3 Design Requirements ......................................................... 14-1  
14.4 References .................................................................... 14-1
# Chapter 15  Abutments, Retaining Walls, and Reinforced Slopes

15-1  Introduction and Design Standards ................................. 15-1
15-2  Overview of Wall Classifications and Design Process for Walls ............ 15-2
15-3  Required Information ...................................................... 15-3
15-4  General Design Requirements ......................................... 15-11
15-5  Wall Type Specific Design Requirements ............................ 15-23
15-6  Standard Plan Walls ....................................................... 15-57
15-7  Temporary Cut Slopes and Shoring .................................... 15-58
15-8  References .................................................................. 15-70
15-9  Appendices .................................................................. 15-74

Chapter 16  Geosynthetic Design .................................................. 16-1
16.1 Overview ........................................................................... 16-1
16.2 Development of Design Parameters for Geosynthetic Application ............................................................... 16-1
16.3 Design Requirements .......................................................... 16-2
16.4 References ........................................................................ 16-2

Chapter 17  Foundation Design for Signals, Signs, Noise Barriers, Culverts, and Buildings ............................................. 17-1
17.1 General .............................................................................. 17-1
17.2 Foundation Design Requirements for Cantilever Signals, Strain Poles, Cantilever Signs, Sign Bridges, and Luminaires - General ......................................................... 17-4
17.3 Noise Barriers .................................................................. 17-11
17.4 Culverts ............................................................................. 17-16
17.5 Buildings .......................................................................... 17-17
17.6 References ........................................................................ 17-20

Chapter 18  Geotechnical Design for Marine Structure Foundations .......................................................... 18-1
18.1 Overview ........................................................................... 18-1
18.2 Design Philosophy ............................................................... 18-1
18.3 Load and Resistance Factors for Marine Structures Subject to Ship Impact ...................................................... 18-1
18.4 References ........................................................................ 18-1

Chapter 19  Infiltration Facility Design ........................................... 19-1
19.1 Overview ........................................................................... 19-1
19.2 Geotechnical Investigation and Design for Infiltration Facilities ................................................................. 19-1
19.3 References ........................................................................ 19-1
