

WSDOT Highway Construction Costs

June 2016

This is a recap of prices bid last quarter and includes a comparison to the previous quarter. It also gives the current year to date bid price for an item. All averages are the weighted average of a set of data. It is intended to provide insight into the cost of an item by showing the range of prices bid. The estimated cost of future projects is dependent on many factors and the unit price selected is determined by an evaluation of past history, future trends and specific details of the project. The average price listed for each item below is not intended to be the bid price used in an estimate.

WSDOT Data through June 2016

The quantities shown in this table represent only quantities of the standard items used to calculate the Construction Cost Index and are not intended to represent the overall quantities of items awarded yearly by WSDOT

Unit bid prices for years when an item was not awarded were calculated by averaging the unit bid price of the year before and the year after

Note: WSDOT 2003 and 2004 CCI data points adjusted to correct for spiking bid prices on structural steel
