Plans Engineer Peer Exchange
Statewide meeting at Bullfrog Maintenance Facility
May 17, 2016

Supporting Accurate PS&E

How PMRS can support the Plans Review Effort.

- Knowing when project offices plan to start the PS&E.
- Communicating information in a consistent manner.
- Storing of PS&E documents for easy retrieval.

Supporting Accurate PS&E

Knowing when project offices plan to start the PS&E.

- Utilizing the schedule with specific PS&E activities.
- Scalable to meet region needs. Provides a consistent information across the region.
- Can be used to determine if the PS&E office has enough resources to meet the various project timelines.

Supporting Accurate PS&E

Communicating information in a consistent manner.

- PMRS has many layouts available in P6 to communicate schedule information. These layouts are very easy to customize to meet individual needs.
- PRI has a PS&E report that is used by OR and ER to provide consistent status information. This report is available for all regions to use.

Supporting Accurate PS&E

Storing of PS&E documents for easy retrieval.

- Utilizing PMRS ECM System.
 - Enterprise (or Electronic) Content Management ([ECM](#)) is technology that helps organizations to manage important documents and unstructured information.
 - Supports key word and full text search across multiple repositories.
 - Capable of using a work flow for document review.
