

## Request for Traffic Data

Traffic data is accessible for our internal and external customers through the Traffic Data Geoportal. This application uses a mapping interface to provide Annual Average Daily Traffic (AADT) volumes for numerous locations on the state highway system, and allows users to download data files containing hourly volumes and monthly statistics from Permanent Traffic Recorder (PTR) sites.

<http://www.wsdot.wa.gov/mapsdata/tools/trafficplanningtrends.htm>

If the data available through the Traffic Data Geoportal does not meet your needs, please complete this request form and e-mail it to [TDGMOTrafficDataRequests@WSDOT.WA.GOV](mailto:TDGMOTrafficDataRequests@WSDOT.WA.GOV)

When completing this form, please note that for most locations where traffic is monitored the studies are usually restricted to a four-day midweek period captured once every three years. Only at PTR sites, a list of which is provided on the following pages, is more comprehensive data available. Additionally, while the estimated annual traffic volumes derived from these counts are retained indefinitely, detailed short duration traffic count data is only retained for twenty years, and detailed permanent traffic recorder data is only retained for ten.

Employees of WSDOT can also access traffic data reports through the [Traffic Data Warehouse](#).
