

Correcting instruction on Proprietary Items – February 2021

The September 2020 revisions to the Plans Preparation Manual changed policy regarding approval of proprietary items. Regions are delegated this approval. Changes were made in PPM Division 7, as well as Design Manual Chapter 300. To align with those changes, this technical errata corrects instruction in PPM 400.02(1) I).

Apply the following revised statement.

400.02(1) General

- I) Provide a memorandum, with written justification, to the appropriate regional authority ~~Assistant State Design Engineer (ASDE)~~ for the approval and use of all proprietary items (see Division 7 and Design Manual Chapter 300).

This correction will be incorporated in the next publication of the Plans Prep Manual.
