

Request for Traffic Data

Current and historical vehicular traffic data, including tabular and GIS-based datasets, are accessible for our internal and external customers through our [Traffic Count Data page](#).

Among other resources, the Traffic Data Reporting System provides base data and summary statistics at our network of permanent and short-duration count locations on the state highway system. Users can view data stations in a map interface and access data and statistics through a suite of reports.

If the available data does not meet your needs, please complete this request form and e-mail it to TDGMOTrafficDataRequests@WSDOT.WA.GOV

When completing this form, please note that most traffic monitoring locations have limited base data (daily, hourly, or sub-hourly data), based on 72-hour studies, performed once every three to six years. Only at permanent traffic recorder (PTR) sites, a list of which is provided on the following pages, is more comprehensive data available. Additionally, while the estimated annual traffic volumes derived from these counts are retained indefinitely, detailed short duration traffic count data is only retained for twenty years, and detailed PTR data is only retained for ten.

Employees of WSDOT can also access traffic data reports through the [Traffic Data Warehouse](#).
