IMPORTANT DATES

June 25, 2024	WSDOT posts notice of funding opportunity.
July 23, 2024	Grant application available in the Grants Management System (GMS). Applicants may submit more than one application. Applicants must submit one application per project.
1 p.m. July 31, 2024	Informational webinar for prospective applicants. Register to attend.
3 p.m. Sept. 12, 2024	Grant applications due in GMS.
September-November 2024	Application review and evaluation.
Dec. 1, 2024	WSDOT sends prioritized list of projects to the Legislature and Governor's Office.
May-June 2024	WSDOT sends grant award letters to grantees (subject to bill enactment).
July 1, 2025	2025-2027 biennium begins.
June 30, 2027	2025-2027 biennium ends.

CHAPTER 1: OVERVIEW

ABOUT THE GREEN TRANSPORTATION CAPITAL GRANT PROGRAM

WSDOT's Public Transportation Division administers the state-funded Green Transportation Capital Grant Program. This competitive grant program supports local efforts to reduce the carbon intensity of the Washington transportation system.

Historically, WSDOT has awarded between \$12 million and \$50 million in Green Transportation Capital grants each biennium. The Legislature will determine the funding level for the 2025-2027 biennium in the 2025 legislative session.

This grant program is partially supported by state funding from Washington's Climate Commitment Act (CCA) (76.7 percent). The CCA supports Washington's climate action efforts by putting cap-and-invest dollars to work reducing climate pollution, creating jobs, and improving public health. Information about the CCA is available at www.climate.wa.gov.

As a requirement of the Green Transportation Capital Grant program, WSDOT must incorporate environmental justice principles into the grant selection process.¹

WSDOT is responsible for evaluating applications to the Green Transportation Capital Grant program and developing a prioritized list of eligible projects for funding. WSDOT will submit the prioritized to the Legislature and Governor's Office Dec. 1, 2024.

WSDOT will ensure an equitable distribution to large urban, small urban, and/or rural transit agencies across the state. At least 10 percent of the total amount of the legislative budget for the program will be set aside for rural or small urban transit agencies with an annual operating budget of less than \$15 million. If there aren't enough projects to use the 10 percent set aside for rural or small urban transit agencies, WSDOT will award funds to other competitive projects.

APPLICATION DEADLINE

3 p.m. Thursday, Sept. 12, 2024

FATAL FLAW POLICY

WSDOT follows a formal fatal flaw policy for its grant applications. Fatal flaws for applications to the Green Transportation Capital Grant program include:

- Proposed project is ineligible.
- Application is incomplete with required information missing.
- Application doesn't meet match requirements.
- Applicant is not in compliance with WSDOT's in-good-standing policy.

Applications with fatal flaws won't be scored by the evaluation panel. WSDOT also won't include applications with fatal flaws in the list of prioritized projects submitted to the Legislature and Governor's Office.

WSDOT is responsible for administering grant funds in accordance with state laws. To ensure compliance with state laws and commonly recognized best practices for grant management, WSDOT has

¹ [RCW 47.66.120\(1\)\(c\)](#)

implemented an in-good-standing policy. An application will have a fatal flaw if it's from an applicant who isn't in compliance with WSDOT's in-good-standing policy.

All grant recipients must maintain in-good-standing status to receive payments and be eligible for future funding consideration from WSDOT.

For information about the in-good-standing policy, see the [WSDOT Public Transportation State Grant Programs Guidebook](#).

ELIGIBLE APPLICANTS

- City transit system²
- County public transportation authority³
- Metropolitan municipal corporation transit system⁴
- Public transportation benefit area⁵
- Unincorporated transportation benefit area⁶
- Regional transit authority⁷
- Special purpose district formed to operate a public transportation system

ELIGIBLE PROJECTS

Capital projects and related expenditures may include:

- Electrification of transit vehicle fleets, including battery and fuel cell-operated electric vehicles.
- Updating or modifying facilities for fleet electrification and/or hydrogen refueling infrastructure.
- New facilities that directly and primarily support fleet electrification.
- Construction of charging and fueling stations to support transit fleet electrification.
- Necessary upgrades to electrical transmission and distribution systems.
- In-house staff directly managing a capital construction project.
- Acquisition of property rights for capital projects.

Vehicles, equipment, and zero-emission transition plan applications must be two-year projects only. Construction projects may be two or four years.

Zero-emission fleet transition planning activities may also be an eligible project (contingent upon legislative appropriation of funding).

Contact PTDgrants@wsdot.wa.gov if:

- Your project isn't in the list of eligible above to check project eligibility.

² [RCW 35.58.2721](#) or [Chapter 35.95A RCW](#)

³ [Chapter 36.57 RCW](#)

⁴ [Chapter 36.56 RCW](#)

⁵ [Chapter 36.57A RCW](#)

⁶ [RCW 36.57.100](#)

⁷ [Chapter 81.112 RCW](#)

- You plan to purchase standalone electric vehicle charging infrastructure (not part of facility construction) to determine if the project should be categorized as equipment or construction.

INELIGIBLE PROJECTS AND RELATED COSTS

- Hybrid vehicles
- Used vehicles
- Fossil fuel-powered generators
- Transit operations
- Any cost not directly related to the project

MATCHING FUNDS

You must provide matching funds in the form of direct contributions at a certain percentage of total project costs. Direct contributions are cash or assets that directly benefit the project and are fundamental to implementing the project. In-kind match contributions are not eligible.

The project cannot derive the matching funds from sources that place any restrictions on the services provided with the grant-funded equipment or that place a lien on the grant-funded asset.

The Green Transportation Capital Grant Program uses a tiered match system to determine the minimum required match you must provide. WSDOT determines match by your agency’s most recent annual operating budget submitted to the Washington State Transit Association.

Tier level	Operating budget	Required match
Tier 1	\$35 million or more	20 percent
Tier 2	\$20 million to \$34.9 million	15 percent
Tier 3	\$10 million to \$19.9 million	10 percent
Tier 4	\$5 million to \$9.9 million	5 percent
Tier 5	Less than \$4.9 million	No match required

Previous eligible expenditures directly associated with the proposed project may qualify as match. Applicants may use other grants as match except for competitive state-funded grants administered by WSDOT’s Public Transportation Division.

PASSENGER FARES AND DONATIONS

You may not use passenger fares or passenger donations as matching funds. You must deduct fares and passenger donations from gross expenses to determine net expenses.

You may use donations made directly to your agency as matching funds.

ENVIRONMENTAL JUSTICE ASSESSMENT

WSDOT requires an environmental justice assessment for any grant applicant requesting \$15 million or more in funding for a project from a single WSDOT grant program. The Green Transportation Capital Grant Program application includes new environmental justice assessment questions.

CHAPTER 2: APPLYING FOR FUNDING

GRANTS MANAGEMENT SYSTEM

You must be registered in the GMS before accessing the application. The [GMS registration instructions](#) provide a step-by-step guide for new users to create an account. WSDOT strongly encourages you to complete GMS registration prior to the application opening.

For additional assistance with GMS registration and training, email PTDGMSsupport@wsdot.wa.gov or call 360-705-7711.

APPLICATION PROCESS

You must submit applications for the Green Transportation Capital Grant Program in GMS by **3 p.m. Thursday, Sept. 12, 2024**. WSDOT won't accept late applications.

Space is limited in the application's text boxes. If you need additional space for a response, use the "supplemental information" section near the end of the application.

GMS will confirm submission of each application. The confirmation won't include an assessment of the completeness of the application.

NUMBER OF APPLICATIONS

You may submit more than one application. You must submit one application per project.

Note: You may print the application form from the "application details" screen in GMS. However, WSDOT won't accept scanned or printed applications.

CHAPTER 3: APPLICATION QUESTIONS

STARTING THE APPLICATION

1. Access GMS.
2. Select “funding opportunities” in the left-hand column.
3. Select the 25-27 Green Transportation Capital Grant Program opportunity.
4. The first time you access a funding opportunity, select “start new application.” When you return to GMS, you’ll find your draft applications listed under “current applications” in the “applications module.”

SAVING AND COMPLETING APPLICATION SECTIONS

As you input information into sections, click the green “save form” button often. Some fields won’t be visible until you save the prior section.

When your responses in a section are final, click the orange “mark as complete” button. The “application details” screen will update the status of each section as you complete them.

When you return to the application after saving work in progress, select any of the incomplete components to continue with the application.

Note: If you only see a full application preview and not a list of sections, select “edit application.”

1. GENERAL INFORMATION

Application creation wizard

After selecting “start new application,” GMS will open the application creation wizard.

Your agency’s information should already be in the system upon registration.

Input the following:

1. **Application title:** Titles shouldn’t be long and may be as brief as two words. You’ll have a chance to provide a more detailed description of the project later in the application.
2. **Primary contact:** This information should self-populate based on your login.

Click the green “save form” button and move to the next section.

3. **Organization:** If your agency’s name hasn’t self-populated, use the dropdown menu to choose your agency.

Click the green “save form” button and move to the next section.

4. **Additional applicants:** From the dropdown menu, add other members of the agency staff who’ll need access to the application, including the staff person that’s authorized to submit the application on behalf of your agency. This responsibility may be delegated to the grants manager, budget manager, or other related position. The dropdown menu includes names at your agency that were added during registration.

Click the green “save form” button and move to the next page.

2. ORGANIZATION CONTACT INFORMATION

Complete all required fields to enter the appropriate contact information. You may list the same person multiple times.

3. SUMMARY OF PROJECT INFORMATION

Project summary

Provide a brief, high-level description of your project. WSDOT may use this description to describe your project to the Legislature.

Service area

Use the dropdown boxes to choose the state legislative district(s) and county(ies) your project will serve (include the entire project area). Hold down the control key (Ctrl) to make multiple selections.

4. RELATIONSHIP TO OTHER PROJECTS

WSDOT Public Transportation Division has many different funding opportunities where a single project may be eligible. Due to our awarding timelines, we recognize that you may not know the results of an application until the beginning of a new biennium.

Your responses to the questions in this section will inform the grant administrators of relationships between your projects, thereby reducing the potential for duplicate awards for the same project or failure to award projects that are dependent on each other.

Is your project dependent on any other projects submitted by your organization?

Select “yes” or “no.”

If yes, describe the relationship between the projects in both applications. Identify the priority for funding (if applicable).

Did you, or will you, apply for this project in another grant program this biennium?

Select “yes” or “no.”

If yes, identify the grant program(s). Select “other” to indicate any local, state, or federal assistance requests not through WSDOT Public Transportation Division and enter the name(s) of the other grant program(s).

Have you applied for the same project in a prior biennium and did not receive funding?

Select “yes” or “no.”

Are you applying for other projects within this funding opportunity?

Select “yes” or “no.”

If yes, list all applications for this funding opportunity in order of priority.

5. PROJECT TYPE

Identify the project activities included in your proposal and answer the corresponding questions. You must select “yes” to at least one of the following project types.

Zero-emission transition planning

Zero-emission transition planning activities (eligible if funding is appropriated by the Legislature).

Select “yes” or “no.”

If you respond “yes”, describe the zero-emission fleet transition planning activities you’re proposing.

Have you previously received a Green Transportation Capital Grant for zero-emission fleet transition planning?

If you respond yes, describe how the scope of this planning request is different from past awards.

Vehicles and equipment

Procurement of battery electric or hydrogen fuel cell vehicles.

Select “yes” or “no.”

Procurement of standalone fleet charging/refueling equipment that isn’t part of a capital construction project.

Select “yes” or “no.”

Capital construction

New, updated, or modified capital facilities or infrastructure that directly supports decarbonization of the transit system.

Eligible construction projects include new, modified, or updated capital facilities or infrastructure that directly supports decarbonization of the transit system. Projects may include necessary upgrades to electrical transmission and distribution systems.

Select “yes” or “no.”

If you respond “yes,” answer the questions that follow for your construction project.

Duration of construction project

Select the duration of your project. Capital construction projects may be two or four years.

Construction project type

Select the type(s) of construction activities in your project. Hold down the control key (Ctrl) to make multiple selections.

If you selected “other,” briefly describe the infrastructure you’re proposing.

Describe how the proposed infrastructure and/or utility upgrades will support your transit system.

Describe the electrical capacity of the proposed infrastructure.

Number of vehicles served

Enter the number of vehicles that will be served by the proposed infrastructure using positive whole numbers only.

Percentage of fleet served

Enter the percentage of your agency's fleet your proposed infrastructure will serve (number of vehicles served divided by total fleet size).

Google Street View links

Provide the requested Google Street View location links that apply to your capital construction project. Leave fields that don't apply blank. If a Google Street View link isn't available for your project site, include a Google map of the location (with coordinates) in the "attachments" section.

6. SCOPE OF WORK

Tasks and deliverables

Briefly describe your project with the specific tasks and deliverables you're proposing. Address the who, what, when, and where of your project. Examples of short scopes of work:

- Purchase two, large electric buses to replace two, large diesel buses with that are being used in XYZ Transit's fixed route service. These buses will be at or beyond their expected useful life in March 2024.
- Install a new transformer at the XYZ transit station and construct two charging pedestals that will service 10 electric buses in the fleet.

Geographic area

Describe the geographic area the project will serve.

Green project goals

Describe how the project advances your agency's green transportation goals.

Measurable objectives

Describe the measurable objectives of the project.

Projected results

Describe the projected results of the project.

Readiness to proceed

Describe your agency's readiness to proceed with the proposed work.

7. PROJECT BENEFITS

Carbon reduction benefits

Describe the carbon reduction benefits of the proposed project. As much as possible, quantify estimated carbon reduction from the project and describe the methodology and/or tools you used to make these estimates. Some projects, such as zero-emission fleet transition planning, may not result in quantifiable emissions reductions.

Overburdened communities and vulnerable populations

Identify the overburdened communities and vulnerable populations this project will serve, if any.

Vulnerable populations are population groups that are more likely to be at higher risk for poor health outcomes in response to environmental harms due to adverse socioeconomic factors and sensitivity factors. Vulnerable populations include:⁸

- Racial or ethnic minorities.
- Low-income populations.
- Populations disproportionately affected by environmental harms.
- Populations of workers experiencing environmental harms.

Overburdened communities are geographic communities that face disproportionate cumulative negative impacts from environmental health factors. Overburdened communities include but are not limited to:⁹

- Communities highly affected by fossil fuel pollution and climate change.
- Communities located in census tracts that are fully or partially on “Indian country.”
- Populations who may be exposed to environmental contaminants and pollutants outside of the geographic area in which they reside based on the populations' use of traditional or cultural foods and practices.

You may use a screening and mapping tool such as [Washington State Overburdened Communities Map](#), [EJScreen](#), [Washington Tracking Network](#), [Equitable Transportation Community Explorer](#), or another resource of your choice, to describe the overburdened communities and vulnerable populations this program will serve.

Direct and meaningful benefits

Identify the type of direct and meaningful benefits your project will provide to overburdened communities and vulnerable populations. Explain how your project provides these benefits.

Examples of direct and meaningful benefits include:¹⁰

- Reducing vulnerable population characteristics, environmental burdens, or associated risks that contribute significantly to the cumulative impact designation of highly impacted communities.
- Meaningfully protecting an overburdened community from, or supporting community response to, the impacts of air pollution or climate change.
- Meeting a community need identified by vulnerable members of the community.

Community outreach and engagement

Describe your outreach and/or engagement with the communities you identified to develop your understanding of the project's benefits.

Additional benefits

Describe any additional benefits that may result from your project.

⁸ [RCW 70A.02.010](#)(14)(a) and (b)

⁹ [RCW 70A.65.010](#)(54)

¹⁰ [RCW 70A.65.230](#)(1)(a))

8. PROJECT COORDINATION

Describe your agency's coordination efforts for this project.

Utility and hydrogen providers

Early coordination with utility and hydrogen providers is essential for projects that increase electrical power or add hydrogen refueling at your transit agency.

You must attach a letter of coordination from your utility and/or hydrogen provider if your project includes electrical power modifications or hydrogen refueling. If your agency is generating its own hydrogen, no letter of coordination is needed.

Letters from your provider(s) must describe coordination already in progress and additional coordination that will occur throughout the project. If you're working with multiple hydrogen providers, at least one letter of coordination is required. Upload your letter(s) of coordination in the "attachments" section.

Does your project require coordination with an electric utility provider?

Select "yes" or "no."

If you select "yes", provide the following information:

- Provider name(s)
- Describe the role of your utility and/or hydrogen provider(s) in your project and any coordination already in progress.

Additional coordination

Identify any other organizations you're coordinating with on this project. Briefly describe the coordination required and any coordination already in progress. Click the green "add row" button to add a new organization to the table.

Tribal support

"Tribes" refers to federally recognized tribes when used in this application. Federally recognized tribes include any Indian or Alaska Native tribe, band, nation, pueblo, village, or community that the Secretary of the Interior acknowledges to exist as an Indian tribe pursuant to the Federally Recognized Indian Tribe List Act of 1944, 25 U.S.C.479a.

Your responses to the questions in the tribal support section aren't scored. Awards aren't based on applicants submitting a tribal resolution formally supporting the project.

Responses to the following questions are for WSDOT reporting to the Legislature to meet requirements under the CCA and Healthy Environment for All (HEAL) Act.

For projects that serve federally recognized tribes, please either attach a copy of the tribal resolution supporting your project or correspondence from the tribe's transportation lead (or a similar position) confirming the tribe's intent to develop a resolution formally supporting your project. An email is sufficient.

Is your project serving and is it supported by a tribal nation in Washington?

Select "yes" or "no."

If you select "yes", provide the following information:

- Estimate the percentage of your project that serves the tribe.

- Check the box that confirms your outreach to the tribe in pursuit of a resolution formally supporting the project.
- If available, attach the formal tribal resolution supporting your project.

If your project isn't yet supported by a formal tribal resolution, attach correspondence with the tribe's transportation lead or a similar position that confirms the tribe's support for the project. This correspondence should also confirm the tribe's intent to develop a resolution formally supporting your project. An email is sufficient.

If we award your project, you should deliver the final resolution formally supporting your project prior to the end of your contract period.

9. MILESTONES

Project activities

Complete the milestone table for all project activities. If an activity isn't applicable to your project, mark "no." If a milestone is already completed, enter the completion date, and add "completed" to the notes.

For milestones that apply to your project, select "yes," add the projected completion date, and include any applicable notes.

Use the "equipment" section for any equipment purchases that aren't part of your vehicle or construction request.

Milestone risks

Identify and describe the risks that may affect the timely completion of your project and possible mitigation strategies.

10. BUDGET

Provide budget details for the project's activities in the appropriate tables by adding rows. Click the green "save form" button to begin adding budget information.

Budget description

Describe how the proposed budget supports your project.

Tiered match (new match requirement)

You must provide matching funds as direct contributions, which are cash or other assets that directly benefit your project and are fundamental to implementing the project. The minimum match percentage is determined by your agency's 2023 operating budget reported to the Washington State Transit Association.

Select your agency's operating budget from the drop-down menu to determine your required minimum match percentage.

Transit vehicles

Create an individual budget line item for each vehicle by clicking the green "add row" button.

The line item should include all costs associated with the vehicle. Vehicle costs may include accessories such as bike racks, wheelchair lifts, annunciators, cameras, electric charging equipment, wraps, logos, driver barriers, factory site visits, etc.

Non-revenue service vehicles (vehicles used to maintain revenue vehicles, perform transit-oriented administrative duties, etc.) will be part of your equipment budget.

Transit vehicle projects are eligible for two-year awards only.

Round your total cost and match to the nearest dollar. Don't include cents in your budget. The amount you request will auto-populate when you complete a row and save.

Replace or expand

Indicate whether the transit vehicle purchase is to expand the fleet or replace a vehicle. Definitions:

- **Expansion:** Acquisition of vehicles for expansion of transit service.
- **Replacement:** Replacement of vehicles having reached the end of their minimum useful life to maintain existing transit service.

Vehicle description

Choose the vehicle type from the dropdown menu.

Useful life

Enter the vehicle's years of useful life. Use [Appendix A](#) to determine the useful life of the vehicle you plan to purchase.

Passenger seating

Indicate the number of seats (not counting driver) when the vehicle is at maximum capacity, with no adjustments for wheelchair stations.

Wheelchair stations

Indicate the number of wheelchair-securement positions the vehicle will accommodate. If the vehicle has no ADA-accessible seating, enter zero.

Fuel type

Select the appropriate type of fuel from the dropdown menu.

Vehicle cost description

Describe the calculation of base cost of the vehicle plus any accessories bundled into the price of the vehicle. For example, vehicle base cost at \$40,000 plus lift at \$5,000.

Total cost of vehicle with accessories

Enter your cost estimate for the vehicle including any accessories bundled into the price of the vehicle.

Match

Enter your agency's matching funds for the vehicle.

Requested amount

Total vehicle cost less match. (GMS will auto-calculate this amount.)

Click the green "save row" button.

Equipment

Equipment is an article of nonexpendable, tangible property that has a useful life of at least one year.

Any standalone equipment that isn't associated with a revenue vehicle or connected to a facility, such as a support vehicle (vehicles used to maintain revenue vehicles, perform transit-oriented administrative duties, etc.) will have its own budget line item.

Equipment projects are two years only. Click the green "add row" button to add equipment.

Develop your budget line item(s) using the following guidelines:

- Equipment with a replacement value greater than \$50,000 must have an individual budget line item for each piece of equipment. This piece of equipment will become a new individual asset in your Transit Asset Management Plan.
- Electric vehicle chargers must have an individual budget line item for each charger, regardless of cost. If you plan to purchase standalone electric vehicle charging infrastructure (not part of facility construction), please contact WSDOT to determine if the project should be categorized as equipment or construction.
- Service vehicles of any replacement value must have an individual budget line item for each service vehicle.
- Equipment with an individual replacement value less than \$50,000 (except electric vehicle chargers) will be one line item with a combined total cost. For example, if the grant is purchasing 10 pieces of equipment at \$2,000 each, the line item will be for \$20,000 total. For two pieces of equipment at \$30,000 each, the line item will be for \$60,000 total.
- Equipment installation costs must be an individual budget line item separate from the equipment itself (Equipment – Installation) and will include all installation costs such as design, installation, etc.

Round your total cost and match to the nearest dollar. Don't include cents in your budget. The amount requested will auto-populate when you complete a row and save.

Equipment description

Identify and briefly describe the equipment you're requesting. If applicable, include the number and cost per item.

Total cost

Enter the total cost of the equipment.

Match

Enter your agency's matching funds for the equipment.

Requested amount

Total project cost less match. (GMS will auto-calculate this amount.)

Click the green "save row" button.

Construction

Provide budget details for the project activities in the appropriate table based on which phase of construction your expenses will occur (i.e., design/preliminary engineering phase, right-of-way phase, construction phase).

Enter the project activity, biennium one cost and match amount, and biennium two cost and match amount, if applicable.

Include all costs for the construction phase (i.e., contractor costs, construction oversight costs, equipment costs). Include equipment connected to the facility as part of the facility asset.

Round your total cost and match amounts to the nearest dollar. Don't include cents in your budget. The amount requested will auto-populate when you complete a row and save.

Click the green "save row" button.

Zero-emission transition planning

Complete this budget table if your project includes zero-emission fleet transition planning activities.

Zero-emission fleet transition planning projects are two-year awards only.

Enter project activity, total cost, and match amount.

Round your total cost and match amounts to the nearest dollar. Don't include cents in your budget. The amount requested will auto-populate when you complete a row and save.

Click the green "save row" button.

Match source

Identify the specific sources and amounts of matching funds. The total of your match sources should be equal to the total match amount in the budget summary.

Prior eligible expenditures fundamental to implementing the proposed project may qualify for the match requirement. You may use other grants as match except for competitive state-funded grants administered by WSDOT's Public Transportation Division. In-kind match isn't allowed.

Enter each source of match as a separate line item.

Match type:

- Federal
- State
- Local
- Other

Match source

Match sources are funding sources other than passenger fares and ride donations used to support your project and that meet matching funds requirements.

Describe the match source(s) for your project.

Amount

Round to the nearest dollar. Don't include cents.

Scalability/sustainability

WSDOT Public Transportation Division may use its discretion to provide a partial award to capital project when funding is limited, or to make the best use of grant funds.

Is this project scalable?

Select "yes" or "no."

Selecting "yes" indicates your willingness to accept less than the total requested Green Transportation Capital Grant Program funding. If you check "yes," provide the following information:

- Specify the minimum funds needed.
- Describe how the project will change with less grant funding.

Sustainability

Describe how and with what funds you'll maintain the project after the Green Transportation Capital Grant funding expires.

Procurement

Describe the procurement process you plan to use for this project (e.g., vehicle purchase using the Department of Enterprise Services or another state cooperative procurement contract, issuing your own request for proposals, simplified acquisition, micro-purchase).

Your agency must have a current procurement policy on file with WSDOT. Current grantees can check the procurement policy on file with WSDOT in the compliance section of the GMS. If your agency doesn't have a policy on file with WSDOT yet, or the version on file is outdated, upload a copy of the policy in the attachments section of your application.

Budget summary

Refresh your budget summary totals after entering all budget information by clicking on the green "edit form" button and then click "save form."

Make sure the amounts are correct and your match percentage meets the minimum required match for your agency. Verify that your total match in the budget summary is the same as the total in your match source table.

Once your budget information is final, click the orange "mark as complete" button.

11. INDIRECT COSTS

Indirect costs are expenses that aren't readily identified with a particular project/grant but are necessary for the general operation of the agency. Examples of indirect costs are administrative expenses, utilities, or maintenance. Indirect costs are usually expressed as a percentage of total direct costs.

Green Transportation Capital grantees may charge indirect costs to planning projects. If you'd like to include indirect costs for a construction project, please contact WSDOT to discuss eligible costs. Indirect costs aren't allowed for vehicles and equipment projects.

Select "yes" or "no" to indicate whether you are charging indirect costs to this grant/project.

If you select “yes,” your agency must have an approved indirect cost rate **or** cost allocation plan. Indirect costs must be included in the application budget. If indirect costs are part of your project budget, you must attach your cost allocation plan or documentation of your approved indirect cost rate in the attachments section.

Indirect cost rate documentation may be one of the following:

- A letter from your agency confirming that you plan to use the federal 10 percent de minimis indirect cost rate.
- Documentation from your federal cognizant agency that verifies your agency’s approved indirect cost rate.
- Documentation on how you arrived at the indirect cost rate your agency wants to use (usually based on previous year expenditures and current year budget). If awarded, WSDOT Public Transportation Division approval of the indirect cost rate is required.
- A cost allocation plan approved and signed by an authorized representative of your agency. Agencies often determine indirect costs for operating projects using a cost allocation plan. If awarded, WSDOT Public Transportation Division approval of the cost allocation plan is required.

12. VEHICLE REPLACEMENT

Are you replacing or rebuilding a vehicle?

Vehicle rebuilds aren’t eligible in Green Transportation Capital Grant projects.

Select “edit form.” If you aren’t replacing a vehicle, select “no” and “save form.” Select the orange “mark as complete” button.

If you’re requesting to replace a vehicle, select “yes,” and fill out the vehicle information in the section below.

Vehicle information

Select “add row” to complete the table for the vehicles your project will replace. You must enter each vehicle separately. You must include these vehicles on your agency’s inventory report. Complete the form by providing the following information:

- Replace or rebuild
- Vehicle type
- Year
- Make/model
- Vehicle description
- Fuel type

13. ENVIRONMENTAL JUSTICE ASSESSMENT

Environmental justice in Washington state, as provided in the HEAL Act, addresses disproportionate environmental and health impacts in all laws, rules, and policies by prioritizing vulnerable populations and overburdened communities, the equitable distribution of resources and benefits, and eliminating harm.¹¹

WSDOT Public Transportation Division grant applications have new questions to determine if a project must meet HEAL Act environmental justice assessment requirements. The HEAL Act specifies types of significant agency actions that trigger an environmental justice assessment. These actions include grants of \$15 million or more from a single grant program.¹²

If you are applying for a grant of \$15 million or more, contact WSDOT for assistance in completing an environmental justice assessment early in the process.

14. SUPPLEMENTAL INFORMATION

Use this space to elaborate on information provided in other sections of the application. Keep comments as brief as possible.

You may provide optional supplemental attachments in the attachments section.

15. ATTACHMENTS

Upload the required attachments and any conditionally required or optional attachments that support your project. Provide a brief description of the file you've attached.

To add attachments, click on attachment label to open upload window, select and upload the file, and add a description of the file.

Note: Unless otherwise noted, save all attachments in PDF format. Don't upload encrypted or password-protected files.

Note: WSDOT will consider applications without required attachments, including applicable conditional attachments, incomplete.

Required for all projects

- Service area map (PDF). If you have a shapefile of the service area map available, attach this in the optional attachments section.
- Letters or other documentation committing matching funds. Combine all letters into one PDF.

¹¹ [RCW 70A.02.010](#)

¹² [RCW 70A.02.010\(12\)](#)

Conditionally required

- Letter(s) of coordination with utility and/or hydrogen providers. Combine all letters into one PDF.
 - Letters from utility and/or hydrogen provider(s) must describe coordination already in progress and additional coordination that will occur throughout the project. If you're working with multiple hydrogen providers, at least one letter of coordination is required. If your agency is generating its own hydrogen, no letter of coordination is needed.
- Procurement policy (required for new applicants or current grantees without a current policy on file with WSDOT).
- Indirect costs documentation (required if you're charging indirect costs to the project).

Construction project attachments

- National/State Environmental Protection Act assessment, if available.
- Supplemental construction project information (e.g., building or site designs, site plans, location exhibits), if available.
- Google map(s) with construction project coordinates (required only if Google Street View Link is unavailable).

Optional

- Letters of support.
 - Letters of support should be addressed to your agency (not WSDOT), clearly reference your project, and identify the benefits that'll be gained if your project is funded.
 - Combine all letters of support into one PDF.
- Additional supporting documentation.
- Service area shapefile (ZIP file with all files needed to view).

16. CERTIFICATION

Complete this section by selecting "yes" in the certification field and typing the name of the application authority, their title, and the date. This is the equivalent of an electronic signature. WSDOT doesn't need to obtain a memo or letter delegating authority. This application must be certified by someone authorized or delegated to sign contracts on behalf of your agency.

Your application is subject to the public disclosure laws of Washington state.¹³ If any information is proprietary, let us know as it may be released during a public disclosure request.

This completes your application. Make sure that all information in your application is correct before selecting "submit."

GMS will confirm submission of each application by issuing a confirmation email. The confirmation will not include an assessment of the application's completeness.

¹³ [Chapter 42.56 RCW](#)

CHAPTER 4: EVALUATION AND SELECTION PROCESS

STEP 1. INDEPENDENT EVALUATION PANEL PERFORMS REVIEW

Designated members of the Green Transportation Capital Grant Advisory Committee will review applications and recommend projects for award to WSDOT. The committee includes representatives from WSDOT; Department of Ecology; Department of Commerce; Utilities and Transportation Commission; Washington State University; and large urban, small urban, and rural transit agencies.

The evaluation panel will review and score all eligible applications based on the criteria below. The panel will recommend a prioritized project list to WSDOT.

The maximum score on an application is 100 points. Each criterion can receive a maximum of 20 points.

Criteria	Point value
Project description	20
Scalability, sustainability, and support	20
Project benefits	20
Project budget and cost effectiveness	20
Readiness to proceed and schedule	20

Definitions

Project description: Responses clearly describe the project scope of work, goals, measurable objectives, and anticipated results.

Scalability, sustainability, and support: Responses clearly describe how the project advances the green transportation goals of the transit agency, the scalability of the project, and the extent to which the transit agency has coordinated with necessary partners to successfully implement the project.

Project benefits: Responses connect project benefits to reductions in carbon emissions, including how the project addresses environmental harms and provides environmental benefits for overburdened communities and vulnerable populations.

Project budget and cost effectiveness: Project's request for grant funds is reasonable and reductions in carbon emissions provided by the proposed project are cost effective.

Readiness to proceed and schedule: Applicant can feasibly and successfully implement the proposed project by the end of the grant period.

STEP 2. WSDOT REVIEWS INDEPENDENT EVALUATION PANEL RECOMMENDATIONS

WSDOT will review the independent evaluation panel's recommendations and submit a prioritized list to the Legislature and Governor's Office.

WSDOT will use the following priorities to further prioritize projects:

- Equitable distribution to large urban, small urban, and/or rural transit agencies across the state.
- At least 10 percent of the total amount of the legislative budget for the program will be set aside for rural or small urban transit agencies with an operating budget of less than \$15 million. If there aren't enough projects to use the 10 percent set aside for rural or small urban transit agencies, WSDOT will award funds to other competitive projects.

WSDOT reserves the right to fund a portion of a proposed project if it possesses independent utility and the applicant indicates the project/application is scalable.

STEP 4. LEGISLATURE TAKES ACTION

The Legislature will act on the prioritized list during the development of the 2025-2027 transportation budget.

The Legislature will send the budget to the governor for consideration.

STEP 5. GOVERNOR TAKES ACTION

The governor will act on and sign the 2025-2027 transportation budget.

STEP 6. WSDOT SENDS AWARD LETTERS AND FINALIZES GRANT AGREEMENTS

Once the governor signs the budget for the 2025-2027 biennium, WSDOT will:

- Send letters notifying applicants of funding decisions (independent evaluation panel's comments are available by request).
- Finalize grant agreements for projects funded in the transportation budget.

APPENDIX A: VEHICLE MINIMUM USEFUL LIFE

Category	Typical characteristic Length (feet)	Typical characteristic Weight (pounds)	Minimum life: whichever comes first Years	Minimum life: whichever comes first Miles	Example
Heavy-duty large bus	35-48 and 60 articulated	33,000-40,000	12	500,000	
Heavy-duty small bus	28-35	26,000-33,000	10	350,000	
Medium-duty small bus	Less than 35	16,000-26,000	7	200,000	
Medium-duty truck chassis-built cutaway	Less than 35	16,000-26,000	7	200,000	
Light-duty van chassis-built cutaway	20-35	10,000-16,000	5	150,000	
Light-duty small van chassis-built cutaways and van	Less than 20	6,000-14,000	4	100,000	
Specialty vehicle not fitting in the above categories	Varies	Varies	Negotiable	Negotiable	

APPENDIX B: GLOSSARY

Materials can be made available in an alternate format by emailing the Office of Equal Opportunity at wsdotada@wsdot.wa.gov or by calling toll free, 855-362-4ADA (4232). Persons who are deaf or hard of hearing may make a request by calling the Washington State Relay at 711.

Title VI notice to the public

It is the Washington State Department of Transportation's (WSDOT) policy to assure that no person shall, on the grounds of race, color, national origin, or sex, as provided by Title VI of the Civil Rights Act of 1964, be excluded from participation in, be denied the benefits of, or be otherwise discriminated against under any of its federally funded programs and activities. Any person who believes his/her Title VI protection has been violated may file a complaint with WSDOT's Office of Equal Opportunity (OEO). For additional information regarding Title VI complaint procedures and/or information regarding our non-discrimination obligations, please contact OEO's Title VI Coordinator at 360-705-7090.

Español

Notificación de Título VI al Público

Es la política del Departamento de Transportación del Estado de Washington (WSDOT, por sus siglas en inglés) asegurarse que ninguna persona, por razón de raza, color, origen, o nacionalidad, según provee el Título VI de la Ley de Derechos Civiles de 1964, pueda ser excluido de la participación, negado los beneficios de o ser discriminado de otra manera bajo cualquiera de sus programas y actividades. Cualquier persona que crea que su protección bajo el Título VI ha sido violada, puede presentar una queja o reclamación ante la Oficina de Igualdad de Oportunidades (OEO, por sus siglas en inglés) del Departamento de Transportación del Estado de Washington (WSDOT, por sus siglas en inglés). Para obtener información adicional sobre los procedimientos de quejas y/o reclamaciones bajo el Título VI y/o información sobre nuestras obligaciones anti- discriminatorias, pueden contactar al coordinador del Título VI en la EEOC 360-705-7090.

Información de la Ley sobre Estadounidenses con Discapacidades (ADA, por sus siglas en inglés)
